Visual Analysis of Humans Thomas B. Moeslund, Adrian Hilton, Volker Krüger, Leonid Sigal, 2011-10-08 This unique text reference provides a coherent and comprehensive overview of all aspects of video analysis of humans Broad in coverage and accessible in style the text presents original perspectives collected from preeminent researchers gathered from across the world In addition to presenting state of the art research the book reviews the historical origins of the different existing methods and predicts future trends and challenges Features with a Foreword by Professor Larry Davis contains contributions from an international selection of leading authorities in the field includes an extensive glossary discusses the problems associated with detecting and tracking people through camera networks examines topics related to determining the time varying 3D pose of a person from video investigates the representation and recognition of human and vehicular actions reviews the most important applications of activity recognition from biometrics and surveillance to sports and driver assistance

Advances in Biometrics Seong-Whan Lee, Stan Z. Li, 2007-08-30 This book constitutes the refereed proceedings of the International Conference on Biometrics ICB 2007 held in Seoul Korea August 2007 Biometric criteria covered by the papers are assigned to face fingerprint iris speech and signature biometric fusion and performance evaluation gait keystrokes and others In addition the volume also announces the results of the Face Authentication Competition FAC 2006

Search Techniques in Intelligent Classification Systems Andrey V. Savchenko, 2016-05-02 A unified methodology for categorizing various complex objects is presented in this book Through probability theory novel asymptotically minimax criteria suitable for practical applications in imaging and data analysis are examined including the special cases such as the Jensen Shannon divergence and the probabilistic neural network An optimal approximate nearest neighbor search algorithm which allows faster classification of databases is featured Rough set theory sequential analysis and granular computing are used to improve performance of the hierarchical classifiers Practical examples in face identification including deep neural networks isolated commands recognition in voice control system and classification of visemes captured by the Kinect depth camera are included This approach creates fast and accurate search procedures by using exact probability densities of applied dissimilarity measures This book can be used as a guide for independent study and as supplementary material for a technically oriented graduate course in intelligent systems and data mining Students and researchers interested in the theoretical and practical aspects of intelligent classification systems will find answers to Why conventional implementation of the naive Bayesian approach does not work well in image classification How to deal with insufficient performance of hierarchical classification systems Is it possible to prevent an exhaustive search of the nearest neighbor in a database

Enhancing Information Security and Privacy by Combining Biometrics with Cryptography Sanjay Kanade, Dijana Petrovska-Delacretaz, Bernadette Dorizzi, 2022-05-31 This book deals with crypto biometrics a relatively new and multi disciplinary area of research started in 1998 Combining biometrics and cryptography provides multiple advantages such as

revocability template diversity better verification accuracy and generation of cryptographically usable keys that are strongly linked to the user identity In this text a thorough review of the subject is provided and then some of the main categories are illustrated with recently proposed systems by the authors Beginning with the basics this text deals with various aspects of crypto biometrics including review cancelable biometrics cryptographic key generation from biometrics and crypto biometric key sharing protocols Because of the thorough treatment of the topic this text will be highly beneficial to researchers and industry professionals in information security and privacy Table of Contents Introduction Cancelable Biometric System Cryptographic Key Regeneration Using Biometrics Biometrics Based Secure Authentication Protocols Concluding Remarks

Intelligent Systems in Science and Information 2014 Kohei Arai,Supriya Kapoor,Rahul Bhatia,2015-02-13 The book Intelligent Systems in Science and Information 2014 is the carefully edited collection of 25 extended chapters from selected papers in the field of Computational Intelligence that which received highly recommended feedback during the Science and Information Conference SAI 2014 review process All chapters have gone through substantial extension and consolidation and were subject to another round of rigorous review and additional modification and represent the state of the art of the cutting edge research and technologies in the related areas *Intelligent Computing Theories and Application* De-Shuang Huang,Kang-Hyun Jo,2016-07-11 This two volume set LNCS 9771 and LNCS 9772 constitutes in conjunction with the volume LNAI 9773 the refereed proceedings of the 12th International Conference on Intelligent Computing ICIC 2016 held in Lanzhou China in August 2016 The 221 full papers and 15 short papers of the three proceedings volumes were carefully reviewed and selected from 639 submissions The papers are organized in topical sections such as signal processing and image processing information security knowledge discovery and data mining systems biology and intelligent computing in computational biology intelligent computing in scheduling information security advances in swarm intelligence algorithms and applications machine learning and data analysis for medical and engineering applications evolutionary computation and learning independent component analysis compressed sensing sparse coding social computing neural networks nature inspired computing and optimization genetic algorithms signal processing pattern recognition biometrics recognition image processing information security virtual reality and human computer interaction healthcare informatics theory and methods artificial bee colony algorithms differential evolution memetic algorithms swarm intelligence and optimization soft computing protein structure and function prediction advances in swarm intelligence algorithms and applications optimization neural network and signal processing biomedical informatics and image processing machine learning knowledge discovery and natural language processing nature inspired computing and optimization intelligent control and automation intelligent data analysis and prediction computer vision knowledge representation and expert system bioinformatics Face, Expression, and Iris Recognition Using Learning-based Approaches Guodong Guo,2006 **Data Sources** ,2000 *Automatic Target Recognition* ,2007 **Proceedings** ,2004 Conference Proceedings of the 2001 International Conference on
