Teaching Reading Comprehension to English Learners in Secondary Schools: A Research-Based Approach

Cekiso, Madoda, Olifant, Florence, Mokhtari, Kouider, 2025-04-23 Teaching reading comprehension to English learners ELs in secondary schools presents unique challenges as these students must navigate the complexities of academic texts and the intricacies of language acquisition. Effective instruction requires a research-based approach that considers the diverse linguistic, cultural, and cognitive backgrounds of these learners. Recent studies highlight the importance of integrating strategies that build both language proficiency and content knowledge, essential for helping ELs develop the skills needed to comprehend complex materials. Fostering metacognitive awareness through strategies like summarizing, questioning, and making connections can empower students to become active and strategic readers. This approach recognizes the need for a supportive, inclusive classroom environment that encourages language development while promoting academic achievement in content areas. Further research may help educators provide English learners with the tools to thrive as capable readers in secondary school. Teaching Reading Comprehension to English Learners in Secondary School: A Research-Based Approach explores various aspects of teaching reading comprehension to English Second Language (ESL) learners in secondary schools. It examines current challenges and evidence-based strategies in reading comprehension. This book covers topics such as language learning, reading strategies, and teacher training, and is a useful resource for academicians, researchers, and scientists.

Piper, 2021-05-23 To address chronically low primary school completion rates and the disconnect between learners' skills at the end of primary school and the skills learners need to thrive in secondary school, identified in many low and middle income countries, more investment is needed to improve the quality of teaching and learning in upper primary grades. Accordingly, we provide guidelines for improving five components of upper primary education: 1. In-service teacher professional development and pre-service preparation to improve and enhance teacher quality; 2. a focus on mathematics literacy and core content area subjects; 3. assessment for learning; 4. high quality teaching and learning materials; and 5. positive school climates. We provide foundational guiding principles and recommendations for intervention design and implementation for each component. Additionally, we discuss and propose how to structure and design pre-service teacher preparation and in-service teacher training and ongoing support, fortified by materials design and assessment to help teachers determine where learners are in

developmental progressions move learners towards mastery and differentiate and support learners who have fallen behind. We provide additional suggestions for integrating a whole school climate curriculum, social emotional learning and school related gender based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary.
