Global Food Systems, Diets, and Nutrition Jessica Fanzo, Claire Davis, 2021-06-05 Ensuring optimal diets and nutrition for the global population is a grand challenge fraught with many contentious issues To achieve food security for all and protect health we need functional equitable and sustainable food systems Food systems are highly complex networks of individuals and institutions that depend on governance and policy leadership This book explains how interconnected food systems and policies affect diets and nutrition in high middle and low income countries In tandem with food policy food systems determine the availability affordability and nutritional quality of the food supply which influences the diets that people are willing and able to consume Readers will become familiar with both domestic and international food policy processes and actors and they will be able to critically analyze and debate how policy and science affect diet and nutrition outcomes

Local, Traditional and Indigenous Food Systems in the 21st Century to Combat Obesity, Undernutrition and Climate Change, 2nd edition Rebecca Kanter, Sofia Boza, Gina Kennedy, 2023-07-31 Traditional and indigenous food systems have existed for centuries and were in balance with local food supplies globally However between the mid 20th and early 21st century the green revolution dramatically altered food production which in turn affected the inclusivity of traditional production systems within food systems and subsequently traditional dietary intakes This change was accompanied by lifestyle changes and spurred a global nutrition transition Today the world faces a global syndemic of obesity undernutrition and climate change A new call to action to create food systems that nourish people and sustain the planet is needed Traditional and indigenous food systems have long been recognized as systems that can both support good human nutrition as well as maintain a balance with nature There is an underutilized knowledge base around traditional and indigenous food systems This includes the knowledge of nutritious species traditional culinary preparations and cultural practices Greater agricultural production of underutilized species can result in more sustainable agricultural and food systems which can also help improve livelihoods and food security Traditional and indigenous cultural practices with respect to both land and water management as well as culinary practices contribute to both sustainable food production and consumption These practices require a greater evidence base in order to be incorporated into public health nutrition initiatives related to improving dietary quality such as food based dietary guidelines for example An increased focus on the importance of local traditional and indigenous food systems and nutrition could therefore help countries to improve human nutrition and ideally help mitigate the global syndemic of obesity undernutrition and climate change This Research Topic will focus on documenting diverse local food systems and promoting elements within them that can help improve nutrition and health both human and planetary in various ways including the livelihood development of knowledge holders

Cereals and Nutraceuticals Joginder Singh, Sawinder Kaur, Prasad Rasane, Jyoti Singh, 2024-08-29 This book is focused on the production cultivation processing composition nutritional value value addition health implications limitations and safety of nutriceals with an emphasis on

their functional significance With changing food habits and increasing health concerns consumers around the world are opting for a more nutritious diet than that was consumed until recently Nutricereals are now becoming a food of choice for many and newer products are being developed using them Thus a better understanding of these valuable crops is becoming essential Researchers and scientists around the world have now turned their attention to nutricereals as a cheaper and most important solution to nutritional deficiencies Processing of these cereals is matter of advanced research in recent times to make it suitable and palatable for human consumption and taste and hence high emphasis is given on processing and value addition of these cereals A comprehensive account of these important aspects is highly required The book covers specific aspects of the nutricereals of consumption pattern and acceptance and the cultivation practices and health benefits associated with their consumption Considerations on processing value addition and safety associated with various nutricereals and current and future challenges and the opportunities for its utilization are highlighted in the book This book forms an important resource on nutricereals for food technologists and food scientists

The Colobines Ikki Matsuda, Cyril C. Grueter, Julie A. Teichroeb, 2022-02-24 The Colobines are a group of Afroeurasian monkeys that exhibit extraordinary behavioural and ecological diversity With long tails and diverse colourations they are medium sized primates mostly arboreal that are found in many different habitats from rain forests and mountain forests to mangroves and savannah Over the last two decades our understanding of this group of primates has increased dramatically This volume presents a comprehensive overview of the current research on colobine populations including the range of biological ecological behavioural and societal traits they exhibit It highlights areas where our knowledge is still lacking and outlines the current conservation status of colobine populations exploring the threats to their survival Bringing together international experts this volume will aid future conservation efforts and encourage further empirical studies It will be of interest to researchers and graduate students in primatology biological anthropology and conservation science Additional online resources can be found at www.cambridge.org/colobines

New Challenges and Future Perspectives in Nutrition and Sustainable Diets in Africa Hettie Carina Schönfeldt, Gloria Essilfie, Yunyun Gong, 2024-05-06 Africa is confronted with the triple burden of malnutrition it is also faced with the triple challenges of poverty inequality and unemployment In many African countries large proportions of the population rely on agriculture not only for their food but also for their livelihoods A transformed agricultural and food system is thus a necessary condition for addressing this double triple challenge Additionally post harvest and food waste and losses reduce the availability of sufficient quantities of safe edible and preferable foods At least one third of food produced at farm level is lost due to inappropriate storage infrastructure and agro processing technologies in developing countries and one third of food purchased is wasted at household and retail level

Primate Behavioral Ecology Karen B. Strier, 2016-08-25 This comprehensive introductory text integrates evolutionary ecological and demographic perspectives with new results from field studies and contemporary noninvasive molecular and hormonal techniques to understand how different primates behave

and the significance of these insights for primate conservation Each chapter is organized around the major research themes in the field with Strier emphasizing the interplay between theory observations and conservation issues Examples are drawn from the classic primate field studies as well as more recent studies on previously neglected species illustrating the vast behavioral variation that exists across the primate order Primate Behavioral Ecology 5th Edition also examines how anthropogenic activities are negatively impacting primate populations including a thorough analysis of behavioural plasticity and its implications This fully updated new edition incorporates exciting new discoveries and the most up to date approaches in the field to provide an invaluable overview of the field of primate behavioral ecology and its applications to primate conservation It is considered to be a must read for all students interested in primates
