Knowledge in the Blood Jonathan D. Jansen,2009-04-07 This book tells the story of white South African students how they remember and enact an Apartheid past they were never part of How is it that young Afrikaners born at the time of Mandela s release from prison hold firm views about a past they never lived rigid ideas about black people and fatalistic thoughts about the future Jonathan Jansen the first black dean of education at the historically white University of Pretoria was dogged by this question during his tenure and Knowledge in the Blood seeks to answer it Jansen offers an intimate look at the effects of social and political change after Apartheid as white students first experience learning and living alongside black students He reveals the novel role pedagogical interventions played in confronting the past as well as critical theory s limits in dealing with conflict in a world where formerly clear cut notions of victims and perpetrators are blurred While Jansen originally set out simply to convey a story of how white students changed under the leadership of a diverse group of senior academics Knowledge in the Blood ultimately became an unexpected account of how these students in turn changed him The impact of this book s unique wide ranging insights in dealing with racial and ethnic divisions will be felt far beyond the borders of South Africa Questions and Replies of the National Assembly South Africa. Mud to bricks: A review of school infrastructure spending and delivery Carmen Abdoll,Conrad Barberton,2014-07-04 The Centre for Child Law commissioned this study by Cornerstone Economic Research to track school infrastructure spending and delivery The report written by Carmen Abdoll and Conrad Barberton makes the concerning finding that the national Department of Basic Education has woefully underspent the School Infrastructure Backlog grant for two years running In 2011 2012 spending was a little over 10 per cent and only at 23 per cent in 2012 2013 at the end of the third quarter The ASIDI target for the number of schools to be built in 2011 2012 and 2012 2013 was 49 However only 10 had been completed by the end of the first year They predict that if the DBE continues at the same delivery rate a realistic timeframe for the eradication of schools with inappropriate structures is probably 2023 24 They make recommendations which if followed could shorten the delay significantly This study shows the importance of monitoring and evaluating progress against court orders and out of court settlements to ensure that the right to a basic education is made real This
