

- Can you answer the question correctly, explaining your answer?
- Can you explain what mistake each of these students has made?
- How would you convince each student that their answer is not right?

What does the following equal?

$$3 - 5 \times 4 + 2$$

A

-19

B

-27

C

-15

D

-6

© Eedi 2020

I think the answer is A because we do the multiplication in the middle first then we add the 2 to it because of bidmas and then we take our product from 3 which earns us the answer

I think the answer is D because 3-5 is -1 then x by four is -4 then you have to add the 2 which equals to -6
