that of language education especially foreign language education Further while a number of important works address issues of critical literacy there are no general works presenting critical perspectives on language and language issues targeting classroom teachers and other educators This work offers a broad and comprehensive overview of language and linguistic issues that emerge in the classroom context from a critical philosophical perspective The central focus is on the nexus of issues of language education and ideology as the title suggests and specific topics covered will include language and power linguistic purism the marginalization of second language education in the United States the phenomenon of ideological monolingualism in the United States the hierarchy of the less commonly taught languages both in terms of its etiology and the ideological and hegemonic functions this hierarchy serves nonmainstream language varieties in school settings issues of linguistic legitimacy in the classroom context the politics and ideological context of bilingual education in the United States language policy both as a tool for oppression and as a means of empowerment and finally the need for critical language awareness on the part of all educators *Paperbound Books in Print* ,1991 **International Bibliography of Sign Language** Guido H.
