Esperanto – Lingua Franca and Language Community Sabine Fiedler, Cyril Robert Brosch, 2022-09-09 This book addresses a fascinating topic a constructed language that has turned from a project into a fully fledged language used by some of its speakers on a daily basis Based on extensive fieldwork this book provides rare and profound insights into the use of Esperanto in a large number of communicative areas It studies the speakers use of code switching phraseology and metaphors techniques they employ to enhance understanding such as metacommunication and repair strategies as well as their predilection for humour The study also contributes to a comparison between the communication in Esperanto and in the language that is now predominantly used as a lingua franca English and allows conclusions to be drawn on the question of what a lingua franca is all about

Language Policy and Linguistic Justice Michele Gazzola, Torsten Templin, Bengt-Arne Wickström, 2018-09-03 Language policies are increasingly acknowledged as being a necessary component of many decisions taken in the areas of the labor market education minority languages mobility and social inclusion of migrants They can affect the democratic control of political organizations and they can either entrench or reduce inequalities These are the central topics of this book Economists philosophers political scientists and sociolinguists discuss from an interdisciplinary perspective the distributive socio economic effects of language policies their impact on justice and inequality at the national or international level as well as the connection between language choices and an inclusive access to public services The range of social and economic issues raised by linguistic diversity in contemporary societies is large and this requires new approaches to tackle them This book provides new input to design better more efficient and fair language policies in order to manage linguistic diversity in different areas Topics covered include theoretical models of linguistic justice and linguistic disadvantage the assessment of the socio economic consequences of language policies the evaluation of the costs benefits and degree of inclusion of language planning measures the politics of migrants linguistic integration as well as multilingualism and economic activities These topics are discussed in different contexts including the areas inhabited by linguistic minorities cities receiving migrants and supranational organizations

Anglicisms around the Globe Henrik Gottlieb, Anabella-Gloria Niculescu-Gorpin, Alicja Witalisz, Keisuke Imamura, Jaime W. Hunt, 2025-11-14 This collection explores the global impact of English through fact based and contrastive analyses of different types of Anglicisms across a wide range of languages This volume showcases the ways in which contact induced language change operates across several different languages simultaneously This approach allows for an examination of similarities and differences in the adaptation

processes of English models in languages with differing phonetic morphological syntactic and writing systems Drawing on data from the Global Anglicism Database GLAD the first multilingual repository featuring lexical and phraseological Anglicisms chapters look not only at visible Anglicisms such as augmented reality or easy listening which reflect their English origin but also at invisible Anglicisms cases in which English expressions are translated verbatim and cases when words in a recipient language change their meaning due to English influence This volume offers a multi layered perspective on how Anglicisms develop and blend into different languages and readers are presented with a nuanced understanding of contact induced language change This book will appeal to students and scholars interested in language contact World Englishes language policy and planning bilingualism and lexicography **International Planned Languages** Detlev

Blanke,2019-01-05 The author of this book the German interlinguist and Esperanto researcher Detlev Blanke 1941 2016 has influenced the study of planned languages like no one else It is to a large extent due to his lifelong scholarly devotion to this area of research that Interlinguistics and Esperanto Studies Esperantology have become serious subjects of study in the academic world In his publications Blanke gives an overview of the history of language creation He describes the most important planned language systems and presents various systems of classification A special focus is put on Esperanto initiated by L L Zamenhof in 1887 Sabine Fiedler For Blanke a planned language was essentially a tool if it worked it was worthy of study and use if it failed to work he was interested in why though at the same time careful to avoid value judgments Blanke himself spoke a planned language namely Esperanto and recognised this language and language projects like it as arising out of a coherent theoretical base and addressing a recognisable problem Essentially independently of the sociolinguistic school in the west Blanke had reached a similar conclusion if a language phenomenon exists it is worthy of scholarly examination in itself Blanke was particularly interested in how planned languages related to ethnic languages how the artificiality of say Esperanto extended to indeed was synonymous with the artfulness of ethnic language and how planned language could solve taxonomic and terminological problems Humphrey Tonkin **Interlinguistics** Klaus
