Wenz,2015 How can we reduce unemployment As this insightful and counterintuitive book shows the surprising answer is
inefficiency Some of the most labor intensive sectors of the economy the author notes are also the most inefficient But this
inefficiency is functional rather than impairing the economy it bolsters employment and fosters economic growth
Technological progress increases efficiency and reduces the need for workers in manufacturing mining agriculture and many
services So how do we keep people working By maintaining inefficiencies in other areas such as in our systems of
transportation and healthcare The author documents the waste of time and money in hospital systems the insurance and
pharmaceutical industries automotive travel road construction and road maintenance These inefficiencies are tolerated
because they provide a lot of jobs and promote economic growth making them functional inefficiencies Most of these

inefficiencies can be reduced without increasing unemployment or impairing economic growth the author claims through increased investment in physical and human infrastructure However continued inefficiencies inherent in consumerism can t be eradicated without economic decline making some inefficiency essential as well as functional Functional Inefficiencyaoffers a wealth of details and a unique analysis of our economic system plus hope for our future prospects through reduced inefficiency *Palmer's Index to the Times Newspaper ,1897*
