

Air Cooled Engine Driven

LINCOLN ELECTRIC® LINCWELDER® 225

DC Portable Arc Welder With AC Power Capacity...

THE IDEAL WELDER for contractors, mill and factory maintenance departments, welding shops and others who need a highly portable machine for erection, production or repair welding inside and out where power connections are not readily available.

DC Welding Output is recommended for the best arc characteristics for all position welding with mild steel, low hydrogen, stainless steel and hard-surfacing electrodes.

225 Amps is enough heat for $\frac{3}{16}$ " general purpose

mild steel electrodes and the $\frac{3}{32}$ " size of all types.

AC Power Output of 3000 watts, 115 volts, 50 hertz, continuous duty is plenty of power for lights and tools needed at welding sites.

Precise Control of Current and Voltage lets the operator select just the heat and arc characteristics needed for every job.

Air Cooled Engine is light and compact for maximum portability; low initial machine cost.

ONAN SUPER CCK TWO-CYLINDER, AIR COOLED ENGINE includes magneto ignition, fuel pump with primer, sediment bowl in gas line, manual choke, governor, air cleaner and cobalt-chrome faced exhaust valves and seats. It is compact, rugged and lightweight to provide long service life with little attention.

EASY STARTING with standard pull rope starter.

OPTIONAL ELECTRIC STARTER for pushbutton starting includes two 12-volt batteries, ammeter and charger rate control. Utilizes welding generator as engine starter motor.

OPTIONAL RECOIL STARTER automatically rewinds starter rope so it is always ready for starting.

OPTIONAL IDLER automatically slows engine to idle speed when not welding to conserve fuel and reduce engine wear. It has a delayed action feature that allows time to change electrodes without having engine slowed to idle speed.

CURRENT RANGE SELECTOR is five-step coarse current adjustment. Ranges overlap so there are no blind spots.

TWIN MUFFLERS for quiet operation.

DUAL 115-VOLT* RECEPTACLES with total capacity of 30 amps.

CURRENT AND OCV FINE ADJUSTMENT RHEOSTAT selects arc characteristics and exact heat within each range needed for every application.

ENGINE CONTROLS located on control panel for maximum convenience.

OUTPUT STUDS for welding cables.

PIPE THAWING on 100-amp position.

OPTIONAL PNEUMATIC TIRE UNDERCARRIAGE for on-site mobility.

*When 230 volt power tools or lights must be operated, the Lincwelder 225 is available with 3000 watts, 230 volts, 50 hertz output. The 230 volt duplex receptacle has a total capacity of 15 amps.
