**Expenditure** represents resources that are allocated to a particular activity. Expenditure is a flow concept, meaning that it is measured over a period of time. Expenditure is a concept that is used in many different contexts, including economics, accounting, and finance. In economics, expenditure is used to measure the total amount of money that is spent on a particular good or service. In accounting, expenditure is used to record the cost of an asset or liability. In finance, expenditure is used to measure the amount of money that is paid out by a company or individual.

The variable is assigned an *if* then *else* statement to the *if* then *else* statement. The variable is then used in the *if* then *else* statement and the *if* then *else* statement is used in the *if* then *else* statement.

\* The variables in column 1 are the principal component variables used in column 2 and are subject to the usual variance-covariance structure. All measures of correlation are based on the usual Euclidean metric.
