Value Chains in Sub-Saharan Africa Sören Scholvin, Anthony Black, Javier Revilla Diez, Ivan Turok, 2019-05-09 Development largely depends on how given places participate in global

economic processes The contributions to this book address various features of the integration of sub Saharan Africa into the world economy via value chains so as to explain corresponding challenges and opportunities The book deals with five issues that have not been covered adequately in scientific debates first policies are essential to promote value chains and increase their impact on development second value chains are diverse and the variance between them has major economic and political implications third regional value chains appear to constitute a viable alternative to global ones or at least are complementary to them promising better developmental outcomes for the Global South fourth political and socio economic factors are important considerations for a complete assessment of value chains fifth cities and city regions are also crucial objects of study in seeking to achieve a comprehensive assessment of value chains Fundamentals of Market Access for Pharmaceuticals Eric Bouteiller, Annie Chicoye, 2024-11-05 Because at the heart of the apparent conflict between public health concerns and capitalistic interests market access for pharmaceuticals is largely driven by political considerations the difference with usual consumer goods being that pharmaceuticals are saving lives or years of life in good health If pharmaceutical companies are to innovate they must be incentivised with prices that reflect the value of their products and the resources and risks involved in their production To ensure appropriate access to new drugs and treatments for patients in need around the world affordability is key How do we tackle this dilemma This question is critical for all stakeholders The development of universal health coverage puts pressure on governments to directly or indirectly control reimbursement and prices of pharmaceuticals whereas the flow of innovations addressing infectious chronic and life threatening diseases is growing constantly This book summarizes various global approaches to solving this dilemma and explores new trends Thanks to the toolbox proposed by the authors not only students but also executives from companies payers regulators and patients organizations can benefit from the supporting concepts and methods that favour greater access to pharmaceuticals **CIS Index to Publications of the United States Congress** Congressional Information Service, 1989 *The Environment Index*, 1973 **F & S Index United States Annual**, 2006 **Who's who in America** John William Leonard, Albert Nelson Marquis, 1908 Vols 28 30 accompanied by separately published parts with title Indices and necrology **America Buys**, 1981 Who's Who in Science and Engineering 2008-2009 Who's Who Marquis, Marquis Who's Who, 2007-12 Index de Périodiques Canadiens, 1997 **Author - Title Catalog** University of California, Berkeley.
