Abdul-Hamid, Mohamed Yassine, 2020-03-18 Education is a source of national pride in Lebanon. When the general public was asked how the education system was performing, 76 percent of respondents had a positive opinion and these satisfaction rates have been consistently high over the years. However, perception of education quality does not reflect the reality of the sector and learning outcomes, which are the determining metrics of success in education, have been lower than the international average with a declining trend since 2007. This volume seeks to uncover why the education system in Lebanon is not reaching its full potential. It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes. This includes the study of context, stakeholders and processes that shape education policies, institutions and activities. It also aims to identify enablers of and constraints on policy change and implementation, as well as the achievement of results. In this context, the analysis encompasses how education policies are developed, how education consumables such as curricula, textbooks and learning materials are produced, distributed and used by learners, how education services are delivered and monitored, and how achieved results are measured. It includes the identification of the most influential actors in the education arena, as well as their vested interests. It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation. The system level analysis presented in this volume used a mixed method approach. Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1,900 research papers, articles and books, laws and policies, expenditures, trends and enrollment and outcome indicators. Primary methods of inquiry were also used and included interviews, focus group discussions and a household based perception survey.

VESPA Handbook Steve Oakes, Martin Griffin, 2024-08-09 The Vespa Handbook builds on the success of Steve and Martin's acclaimed books *The A Level Mindset* and *The GCSE Mindset* by introducing 40 new activities that will help teachers improve the grades of their students. The handbook is a perfect introduction to the VESPA approach, as well as a practical addition to previous resources. Just like their previous books, *The Vespa Handbook* will help teachers develop the five key characteristics and behaviours that students need in order to regulate their own learning: vision, effort, systems, practice and attitude. When it comes to achieving academic success, these characteristics are crucial. The ability of students to have a vision, commit the effort, be organised, practise and revise well, and have a positive attitude and good work ethic are vital to their success. The 40 activities included are set out clearly and categorised thematically under the VESPA umbrella, making them easy to navigate and use in any setting. Each activity can be delivered one to one, to a tutor group or to a whole cohort and is designed to take fifteen to twenty minutes to complete. These activities will help your students to set goals, work more efficiently, organise their resources and manage their workload. *The Vespa Handbook* will empower learners to unlock their potential, overcome obstacles and take control of their own knowledge and skills. It has been written with students in mind and includes spaces for them to record and reflect on their answers and organise their thought process. The book offers a comprehensive toolkit of study techniques, strategies and

approaches that can be applied for effective learning planning organization and execution Steve and Martin share practical advice and valuable insights for teachers looking to improve their students resilience and ambition based on their combined 40 plus years of experience in teaching and coaching Suitable for teachers tutors and parents who want to boost academic outcomes in 14 18 year olds and equip them with powerful tools and techniques in preparation for further education and employment
