- left common carotid and the
- leftsubclavian.

The majority of the time, these vessels are not visible because the aorta was cut too close to the main part of the heart when the heart was removed from the animal.

#### Step 4: Make the Incisions

Now that you have all of the vessels located and marked, you can now open the heart to view the inner chambers. Use the **superior vena cava** and **pulmonary vein** as guides for where to cut. You are basically going to be cutting each side of the heart so that you can look inside. The heart below is marked to show you where the two incisions should be made.

#### Step 5: Viewing the Chambers

At this point it is helpful to have two hands, one to hold the heart apart so you can take a peak inside of it and another to use a probe to locate the specific parts. Your colour pencils you used to mark the heart in step 2 can also now be used to see where those vessels connect within the

Operation Lock and the War on Rhino Poaching John Hanks,2015-05-08 The aggressive poaching of rhinos needs to be countered with equal aggression So argued Prince Bernhard of the Netherlands the founder president of the World Wide Fund for Nature WWF at a 1987 meeting with John Hanks conservation expert and WWF s head in Africa The result was Operation Lock a secret initiative funded by Prince Bernhard and staffed by former SAS operatives Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states Namibia Zambia Botswana Swaziland and Mozambique Its operatives planned to train game rangers to pose as rhino horn traders in order to entrap buyers and to expose the kingpins who were driving the trade It was a controversial approach all the more because it was working within apartheid South Africa in the late 1980s When the existence of the project was finally leaked WWF denied any involvement and John Hanks took the fall In Operation Lock and the War on Rhino Poaching John Hanks finally tells the story of these explosive events from 25 years ago As a leading international authority on conservation he also deals with the scourge of rhino poaching up to the present and gives powerful and controversial criticism of some of the current policies to curb poaching

**Africa's Threatened Rhinos** Keith Somerville,2025-01-14 Africa s surviving rhinos are under serious threat Poaching for their horns massive extermination by sports hunters in the

nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge This book considers human interactions with these magnificent and enigmatic animals charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent

**Situational Prevention of Poaching** Andrew Lemieux, 2014-03-05 For centuries criminologists have looked for scientific ways to study understand and ultimately prevent crime In this volume a unique offense poaching is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence The data sources used range from publically available secondary data about animal populations to interviews with hunters to actual law enforcement data collected inside protected areas Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike which species they target and their modus operandi Collectively the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available While the theoretical grounding of this volume is drawn from criminology it is written for a broad audience of academics practitioners and those interested in wildlife conservation

*Ivory, Horn and Blood* Ronald Orenstein, 2013-07-25 Meticulous research chilling facts an important and much needed book Dr Jane Goodall DBE Founder The Jane Goodall Institute If it is understanding you seek turn these pages Virginia McKenna OBE Founder The Born Free Foundation If you care about elephants and rhinos and the poaching onslaught that threatens their extinction in the wild this is the book for you Ian Redmond OBE Ambassador UN Great Apes Survival Program As recently as ten years ago out of every ten African elephants that died four fell at the hands of poachers The figure today is eight Over sixty percent of Africa's Forest Elephants have been killed by poachers since the turn of the century Rhinoceroses are being slaughtered throughout their ranges The Vietnamese One horned Rhinoceros and the Western Black rhino have become extinct in the last decade and the Northern White Rhinoceros the largest of them all barely survives in captivity This alarming book tells a crime story that takes place thousands of miles away in countries that few of

us may visit But like the trade in illegal drugs the traffic in elephant ivory and rhinoceros horn has far reaching implications not only for these endangered animals but also for the human victims of a world wide surge in organized crime corruption and violence Since the worldwide ban on commercial ivory trade was passed in 1989 after a decade that saw half of Africa s elephants slaughtered by poachers Ronald Orenstein has been at the heart of the fight Today a new ivory crisis has arisen fuelled by internal wars in Africa and a growing market in the Far East Seizures of smuggled ivory have shot up in the past few years Bands of militia have crossed from one side of Africa to the other slaughtering elephants with automatic weapons A market surge in Vietnam and elsewhere has led to a growing criminal onslaught against the world s rhinoceroses The situation for both elephants and rhinos is dire

**Killing for Profit** Julian Rademeyer,2012-11-08 A terrifying true story of greed corruption depravity and ruthless criminal enterprise On the black markets of Southeast Asia rhino horn is worth more than gold cocaine and heroin This is the chilling story of a more than two year long investigation into a dangerous criminal underworld where merciless syndicates will stop at nothing to attain their prize It is a tale of greed folly and corruption and of an increasingly desperate battle to save the rhino which has survived for more than 50 million years from extinction Killing for Profit is a meticulous devastating and revelatory account of one of the world s most secretive trades It exposes poachers gangsters con men mercenaries killers gunrunners diplomats government officials and other key players behind the slaughter And it follows the bloody trail from the front lines of the rhino wars in South Africa Zimbabwe and Mozambique to the medicine markets of Vietnam and the lair of a wildlife trafficking kingpin on the banks of the Mekong River in Laos

Death and Destruction Richard Wayne Charlton,2017 The poaching of wildlife has been a concern to many involved in the protection of wildlife Poaching is found throughout the world and has been around for thousands of years In the past century poaching has reached new heights and the concern of an extinction of a species has brought the topic of poaching to new light Whilst poaching has been seen as a biological or conservation topic in the past criminologists around the world have now started to delve into the topic The poaching of wildlife and more so in recent years rhino poaching has been a concern in South Africa South Africa has seen an increase in rhino poaching in the past 8 years where over 4 000 rhinos have been slaughtered This research aims to give insight into the current rhino poaching epidemic in South Africa and looks at the problem from a criminological point of view where possible solutions can be recommend using criminological theories for the prevention of rhino poaching

**African Rhino** Richard Emslie,1999 The

black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly many failures and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non government organizations and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals and help secure their future in sub Saharan Africa. The overall conclusion is that given the political will, stability and adequate field expenditure rhinos can be conserved in the wild.

*Asian Rhinos*, 1989      *Rhinoceros Horn Poaching Prevention* Tessa Lucille Corbet, 2025. Rhinoceros rhino are an iconic species that barely survived extinction due to poaching and the illegal wildlife trade. Today despite conservation efforts rhinos still face poaching as the biggest threat to their existence. The white rhinoceros also known as square lipped *Ceratotherium simum* and the black rhinoceros *Diceros bicornis* are classified by the International Union for the Conservation of Nature (IUCN) as critically endangered and near threatened respectively. Chanyandura et al 2021. Conservation efforts of the past 50 years have focused on repopulation and poaching prevention however while repopulation efforts have seen population growth in key range states poaching remains an issue. Through case studies of the four rhinoceros range states with the majority of Africa's rhinos I will investigate what factors contribute to variation in rhinoceros poaching nationally in South Africa, Namibia, Kenya and Zimbabwe. This study does this through a historical framework considering the political and social climates in each country. I identify high levels of corruption, private and public land ownership, community engagement, funding for conservation, trophy hunting and ecotourism and the historical and political context as key variables that contribute to rhino protection or the lack thereof. The future of rhino protection must include comprehensive well funded rhino management strategies that include anti corruption frameworks and community based conservation. Engaging local communities and improving management on a national level is central to controlling the rhinoceros poaching crisis.
