Life Sciences Ptopics Grade 12 2014 Caps:

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07 Higher education in post-apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines from African, African American, and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators, and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education.

Remapping Africa in the Global Space Edward Shizha, 2014-11-26 What are the benefits and risks for Africa's participation in the globalisation nexus? Remapping Africa in the Global Space is a visionary and interdisciplinary volume that restores Africa's image using a multidisciplinary lens. It incorporates disciplines such as sociology, education, global studies, economics, development studies, political science, and philosophy to explore and theorise Africa's reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa's internal and international relations. The contributions to this volume are a hybrid of both outsider and insider perspectives that create a balanced critical discourse that can provide standard paradigms that can adequately explain, predict, or prevent Africa's current misperceptions and myths about the African crisis and failure status. The authors provide a holistic and perhaps anticolonial and anti-hegemonic perspective that can benefit a wide spectrum of academics, scholars, students, development agents, policy makers in both governmental and non-governmental organisations and engage some alternative analyses and possibilities for socio-political and economic

advancement in Africa The book provides up to date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa The book is brilliant Remapping Africa in the Global Space Propositions for Change explores Africa from the perspective of academics specialised in subject matters pertaining to the continent In this age of globalisation I find this book invaluable It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way I highly recommend its use in academic institutions Magnus Mfoafo M Carthy Assistant Professor Lyle S Hallman Faculty of Social Work Fellow of Tshepo Institute for the Study of Contemporary Africa Wilfrid Laurier University Kitchener Canada More than anything else Remapping Africa in the Global Space Propositions for Change speaks to the complex multifaceted and interfused character of the development challenges and prospects of Africa Indeed few books have examined contemporary Africa as comprehensively and insightfully as this edited volume it is widely welcomed in the African academic scholarly and research arena Joseph Mensah Professor of Geography York University Toronto *Complexity and Simplicity in Science Education* David Geelan, Kim Nichols, Christine V. McDonald, 2022-01-25 This edited volume brings together a broad range of international science education studies focusing on the interplay of teaching and learning science It recognizes the complexity present in today's education associated with major science related issues faced by society such as climate change diseases and pandemics global conflicts over energy food and water The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow

Learning Science Through Drama Debra McGregor, Dayle Anderson, 2023-01-01 This book presents a wide range of international perspectives that explore the different ways the diverse forms of drama supports learning in science It illustrates how learning science by adopting and adapting theatrical techniques can offer more inclusive ways for students to relate to scientific ideas and concepts The theatrical processes by which subject matter can be introduced thought about discussed transformed enacted and disseminated are shown to be endless The first section of the book considers different ways of theorising and applying drama in classrooms The second section provides a range of case studies illustrating how role play performance embodiment and enquiry approaches can be utilised for learning in primary secondary and tertiary education contexts The third section demonstrates how different research methods from questionnaires particular kinds of

tests and even the theatrical conventions themselves can provide rich data that informs how drama impacts on learning science *Annual Report Mpumalanga* (South Africa).
