L. den Toonder, Bettina van Hoven, 2012 A variety of productions and representations of Canadian identities are the central theme that runs through this book The different contributions explore imagined spaces by considering Canadian music poetry and novels they engage with political space by addressing various ways in which the people of Canada have made claims to different regions in the distant and recent past and they address lived spaces and their actual and symbolic meanings It is an unusual book as it encompasses the writings by those studying the arts and literature as well as writings by social scientists and it includes both English and French speaking scholars The richness that can be found in this multitude of perspectives and approaches to exploring Canadian space is characteristic of the way in which Canadian Studies is practiced nowadays It is therefore an appropriate volume to celebrate 20 years of Canadian Studies in the Netherlands      Advertising the Self in Renaissance France Scott Francis, 2019-04-10 Advertising the Self in Renaissance France explores how authors and readers are represented in printed editions of three major literary figures Jean Lemaire de Belges Clément Marot and François Rabelais Print culture is marked by an anxiety of reception that became much more pronounced with increasingly anonymous and unpredictable readerships in the sixteenth century To allay this anxiety authors as well as editors and printers turned to self fashioning in order to sell not only their books but also particular ways of reading They advertised correct modes of reading as transformative experiences offered by selfless authors that would help the actual reader attain the image of the ideal reader held up by the text and paratext Thus authorial personae were constructed around the self fashioning offered to readers creating an interdependent relationship that anticipated modern advertising Distributed for the University of Delaware Press      *African Doctorates in Mathematics*, 2007 This volume presents a catalogue of over 2000 doctoral theses by Africans in all fields of mathematics including applied mathematics mathematics education and history of mathematics The introduction contains information about distribution by country institutions period and by gender about mathematical density and mobility of mathematicians Several appendices are included female doctorate holders doctorates in mathematics education doctorates awarded by African universities to non Africans doctoral theses by non Africans about mathematics in Africa activities of African mathematicians at the service of their communities Paulus Gerdes compiled the information in his capacity of Chairman of the African Mathematical Union Commission for the History of Mathematics in Africa AMUCHMA The book contains a preface by Mohamed Hassan President of the African Academy of Sciences AAS and Executive Director of the Academy of Sciences for the Developing World TWAS 383 pp      Report of the Session, 1880
