Transforming Education for Sustainability María S. Rivera Maulucci, Stephanie Pfirman, Hilary S.

Callahan, 2023-06-20 This book investigates how educators and researchers in the sciences social sciences and the arts connect concepts of sustainability to work in their fields of study and in the classrooms where they teach the next generation Sustainability with a focus on justice authenticity and inclusivity can be integrated into many different courses or disciplines even if it is beyond their historical focus The narratives describe sustainability education in the classroom the laboratory and the field broadly defined and how the authors navigate the complexities of particular sustainability issues such as climate change water quality soil health biodiversity resource use and education in authentic ways that convey their complexity the sociopolitical context and their hopes for the future The chapters explore how faculty engage students in learning about sustainability and the ways in which working at the edge of what we know about sustainability can be a significant source of engagement motivation and challenge The authors discuss how they create learning experiences that foster democratic practices in which students are not just following protocols but have a stake in creative decision making collecting and analysing data and posing authentic questions They also describe what happens when students are not just passively receiving information but actively analysing debating dialoguing arguing from evidence and constructing nuanced understandings of complex socioscientific sustainability issues The narratives include undergraduate student perspectives on what it means to engage in sustainability research and learning how students navigate the complexities and contradictions inherent in sustainability issues what makes for authentic empowering learning experiences and how students are encouraged to persevere in the field This is an open access book

The Changing Faces of Glutathione, a Cellular

Protagonist Alfonso Pompella, Alessandro Corti, 2015-07-17 Glutathione GSH has been described for a long time just as a defensive reagent against the action of toxic xenobiotics drugs pollutants carcinogens both directly and as a cofactor for GSH transferases As a prototype antioxidant it has been involved in cell protection from the noxious effect of excess oxidant stress both directly and as a cofactor of glutathione peroxidases In addition it has long been known that GSH is capable of forming disulfide bonds with cysteine residues of proteins and the relevance of this mechanism S glutathionylation in regulation of protein function has been well documented in a number of research fields Rather paradoxically it has also been highlighted that GSH and notably its catabolites as originated by metabolism by gamma glutamyltransferase can promote oxidative processes by participating in metal ion mediated reactions eventually leading to formation of reactive oxygen species and free radicals Also a fundamental role of GSH has been recognized in the storage and transport of nitric oxide NO in the form of S nitrosoglutathione GSNO The significance of GSH as a major factor in regulation of cell life proliferation and death can be regarded as the integrated result of all these roles as well as of more which are emerging in diverse fields of biology and pathophysiology Against this background modulation of GSH levels and GSH related enzyme activities represents a fertile

field for experimental pharmacology in numerous and diverse perspectives of animal plant and microbiologic research This research topic includes 14 articles i e 4 Opinion Articles 6 Reviews and 4 Original Research Articles The contributions by several distinguished research groups each from his own standpoint of competence and expertise provide a comprehensive and updated view over the diverse roles the changing faces of GSH and GSH related enzymes in cell s health disease and death

The Best Class You Never Taught Alexis Wiggins,2017-09-27 The best classes have a life of their own powered by student led conversations that explore texts ideas and essential questions In these classes the teacher s role shifts from star player to observer and coach as the students Think critically Work collaboratively Participate fully Behave ethically Ask and answer high level questions Support their ideas with evidence and Evaluate and assess their own work The Spider Web Discussion is a simple technique that puts this kind of class within every teacher s reach The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion lead and support one another s learning and build community It s proven to work across all subject areas and with all ages and you only need a little know how a rubric and paper and pencil to get started As students practice Spider Web Discussion they become stronger communicators more empathetic teammates better problem solvers and more independent learners college and career ready skills that serve them well in the classroom and beyond Educator Alexis Wiggins provides a step by step guide for the implementation of Spider Web Discussion covering everything from introducing the technique to creating rubrics for discussion self assessment to the nuts and bolts of charting the conversations and using the data collected for formative assessment She also shares troubleshooting tips ideas for assessment and group grading and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that s both revolutionary and truly inspiring
