BRICS Innovative Competitiveness Report 2017 Xinli Zhao, Minrong Li, Maoxing Huang, Alexander Sokolov, 2018-08-16 The Report predicts that the coming five years will witness the five countries keep improving in national innovative competitiveness with China and Russia maintaining their strong growth momentum India growing at a moderate rate and Brazil and South Africa gradually picking up speed and climbing out of the trough It estimates that the five countries national innovative competitiveness will be keeping steady growth by 2030 The General Reports part presents a comprehensive analysis of the current status and achievements of STI cooperation between China and other BRICS countries and proposes priority areas of BRICS STI cooperation to provide valuable decision inputs for the BRICS countries to accelerate the improvement of their national innovative competitiveness The Country Reports part respectively analyzes and makes predictions on the national innovative competitiveness of the BRICS countries based on a survey of their STI development and STI cooperation within the BRICS framework The Thematic Reports part focuses on four thematic areas closely related to STI i.e. digital economy financial inclusion energy and agriculture and offers detailed analysis of the STI development and potential of the countries in relevant areas providing additional inputs for a further understanding of the national innovative competitiveness of the BRICS countries The Future of the Professions Richard Susskind, Daniel Susskind, 2022-03-31 This book predicts the decline of today's professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today's professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is

the first book to assess and question the relevance of the professions in the 21st century **Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2017: Statements of interested individuals and organizations** United States.
