Life Sciences Paper September 2013 Grade 11:

Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states especially Kuwait, Qatar, Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity, surprisingly little attention has been paid to the actual mechanics of policy making in the region. This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states. The research coincides with two key developments that have given institutions new importance in the policy process: the emergence of a new generation of leaders in the Gulf and the era of low oil prices. Both developments along with dramatic demographic change have compelled state and citizens to re-evaluate the nature of the social contract that binds them together. Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy. The book shows how academic, social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority. With contributions from both academics and practitioners, this book will be highly relevant for researchers and policymakers alike.

Medical Sexism Jill B. Delston, 2019-10-17 Doctors routinely deny patients access to hormonal birth control prescription refills and this issue has broad interest for feminism, biomedical ethics and applied ethics in general. Medical Sexism argues that such practices violate a variety of legal and moral standards including medical malpractice, informed consent and human rights. Jill B. Delston makes the case that medical sexism serves as a major underlying cause of these systemic and persistent violations. Delston also considers other common abuses in the medical field such as policy on abortion access and treatment in childbirth. Delston argues that sexism is a better explanation for the widespread abuse of patient autonomy in reproductive health and health care generally. Identifying, addressing and rooting out medical sexism is necessary to successfully protect medical and moral values.
