Life Sciences Essay P1 Of 2014:

Heavy Helene A. Shugart, 2016-06-07 The current obesity epidemic has been at the top of the national and increasingly global public agenda for the last decade the subject of extensive and intensive concern scrutiny and corrective efforts from various quarters In the United States much of this attention is predicated on the official discourse or story of obesity that it is a matter of personal responsibility specifically to the end of monitoring and ensuring appropriate caloric balance However even though it continues to have cultural presumption that discourse does not resonate with the populace which may explain why efforts of redress have been notoriously ineffective In this book Helene Shugart places obesity in cultural political and economic context arguing that current anxieties regarding obesity reflect the contemporary crisis in neoliberalism and that the failure of the official discourse of obesity mirrors the failure of neoliberalism more broadly specifically to account for authenticity a powerfully resonant cultural concept today She chronicles a number of competing discourses of obesity that have arisen in response to the failed official discourse examining and evaluating each in relation to the idea of authenticity assessing the practical and behavioral implications of each discourse for both obesity incidence and redress and establishing the significance of each discourse for negotiating neoliberalism in crisis more broadly Dealing with Mission Drift in Parachurch Agencies Israel K. Kombaté, 2025-01-31 Mission drift is a constant threat to any parachurch organization trying to remain mission true and holistically relevant in this post Christian society Defining it as a phenomenon in which Christian based mission agencies stray from their God given vision and identity towards socio humanitarian objectives this study considers this in light of Jesus s own holistic mission exemplified in Matthew 9 35 38 and Luke 4 18 19 This insightful investigation into seven Christian NGOs and NPOs seeks to reveal the underlying reasons and motivations for moving towards mission drift Presenting an exegetical study of the ministry of Jesus Dr Kombaté offers a developed and nuanced understanding of the challenging forces that contribute to mission drift and puts forward tools to minimize its risk A must read for missionaries pastors and leaders in parachurch organizations endeavouring to retain a strong biblically grounded commitment to following holistic mission Artificial Intelligence and Playable Media Eric Freedman, 2022-09-02 This book introduces readers to artificial intelligence AI through the lens of playable media and explores the impact of such software on everyday life From video games to robotic companions to digital twins artificial intelligence drives large sectors of the culture industry where play media and machine learning coexist This book illustrates how playable media contribute to our sense of self while also harnessing our data tightening our bonds with computation and realigning play with the demands of network logic Author Eric Freedman examines a number of popular media forms from the Sony AIBO robotic dog video game developer Naughty Dog s Uncharted and The Last of Us franchises to Peloton s connected fitness equipment to lay bare the computational processes that undergird playable media and addresses the social cultural technological and economic forces that continue to shape user centered experience and design The case studies are drawn from a number of related research

fields including science and technology studies media studies and software studies This book is ideal for media studies students scholars and practitioners interested in understanding how applied artificial intelligence works in popular public and visual culture

Elusive Phenomena, Unwieldy Things Jutta Schickore, William R. Newman, 2024-02-26 This open access book provides a historical treatment of scientific control in experimentation in the longue dur e The introduction distinguishes four related strands in the history of experimental control the development of practices to stabilize experimental conditions the career of the comparative design the unfolding of methodological discussions about control practices and designs and the history of the term control Each chapter brings these distinctions to bear on specific historical episodes The focus is on experiments with complex elusive phenomena such as perception and learning irregular movements and unobservable elements Such experiments bring control issues to the fore because they are difficult to design and stabilize and often controversial Together the chapters show that the local context shapes what exactly is controlled how control can be accomplished and how controls are justified They also show that control strategies and methodological ideas often remain stable for a long time and change only gradually This book as well as the volume on analysis and synthesis in experimentation by the same editors contains contributions by an array of experts from multiple disciplines making it suitable for historians and philosophers of science and students alike

[Yearbook of International Organizations 2014-2015 \(Volume 4\)](#) Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations

[Marine Greens](#) Sesan Abiodun Aransiola, Oluwafemi Adebayo Oyewole, Naga Raju Maddela, Udem Joshua Josiah Ijah, Bangeppagari Manjunatha, 2024-03-27 This book provides an in depth overview of marine greens and their environmental and biotechnological applications It addresses concepts such as the niche adaptation strategies of marine greens in their natural habitats as well as their global distribution and factors affecting their distribution and proliferation Marine greens are posited as an alternative to fossil fuels mitigating global climate change and thereby fostering future environmental sustainability In addition the book explains the remediation of xenobiotics wastewater microplastics marine debris and marine green contamination Expert authors from around the world explore the industrial and agricultural applications of marine greens in the production of enzymes and marine bioenergy and what is needed to

improve its production potential This is important reading for government and non governmental organizations as well as industries and research institutions looking for ways to combat current industrial and environmental challenges

Everybody Wants to Go to Heaven but Nobody Wants to Die: Bioethics and the Transformation of Health Care in America
Amy Gutmann, Jonathan D. Moreno, 2019-08-27 NOW FEATURING A NEW AFTERWORD PANDEMIC ETHICS From two eminent scholars comes a provocative examination of bioethics and our culture's obsession with having it all without paying the price Shockingly the United States has among the lowest life expectancies and highest infant mortality rates of any high income nation yet as Amy Gutmann and Jonathan D Moreno show we spend twice as much per capita on medical care without insuring everyone A remarkable highly readable journey Judy Woodruff sure to become a classic on bioethics Everybody Wants to Go to Heaven but Nobody Wants to Die explores the troubling contradictions between expanding medical research and neglecting human rights from testing anthrax vaccines on children to using brain science for marketing campaigns Providing a clear and compassionate presentation Library Journal of such complex topics as radical changes in doctor patient relations legal controversies over in vitro babies experiments on humans unaffordable new drugs and limited access to hospice care this urgent and incisive history is required reading for anyone with a heartbeat Andrea Mitchell University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles University of California (System). Institute of Library Research, University of California, Berkeley, 1972 **Age of Impact**
James Marins, 2021-09-20 In a time of correction terrorism corruption unemployment hunger cancer depression in which we are constantly bombarded by catastrophic news generating the negative instinct referred to by Hans Rosling the question that surrounds us is who cares Based on a narrative that is both light and impressively profound James Marins sets out to fight apathy and ignorance and make us feel the potential of the era in which we live After all our capacity for opinion action participation and collaboration at scale for systemic changes has never been greater To understand our possibilities we cannot limit ourselves to the narrow view of our personal horizon We need a more comprehensive complex and systemic analysis To do so Marins starts from three fundamental dimensions of the complex richness of our contemporary human condition the Transforming Movement of Freedom the Transforming Movement of Economy and the Transforming Movement of Consciousness All these movements are interconnected in order to constitute the Massive Transformative Movement the backdrop in which the author weaves the entire work The tools for action and for the updating of ourselves are available to all who care in what is humanity's best time our best opportunity The Age of Impact **The Relationship Between Knowledge and Certainty** Valery Berthoud, 2018-11-21 Academic Paper from the year 2018 in the subject Philosophy Miscellaneous grade 2 3 Humboldt University of Berlin course Wittgenstein's *ber Gewissheit* language English abstract The relationship between knowledge and certainty varies according to conception I argue that knowledge and certainty are usually equivalent but there are cases in which certainty is possible without knowledge and knowledge is possible without

certainty The connection between knowledge and certainty does not change much when considering Ren Descartes philosophy because methodological skepticism consists of doubting beliefs that are uncertain That there exist external objects is uncertain because a malicious demon could be deceiving us by creating the illusion of an external world Although Descartes suggests that we can doubt all of our beliefs his conception of science consists of secure insight *Omnis scientia est cognitio certa et evidens* Descartes 1907 This means that all science is certain and evident knowledge or a high degree of certainty Three centuries later G E Moore had another reasoning when writing *A Defense of Common Sense and Proof of an External World* He suggests that doubting that the world exists is unnecessary we must trust that the universe exists He is against George Berkeley's suggestion that matter does not exist everything is just ideas of the mind of God and to be is to perceive This is similar to propositions from Gottfried Wilhelm Leibniz who was an idealist because he claimed that all possible worlds lie in God and we are substances observing the best alternative Leibniz 2014 43 46 Moore suggests that it is irrational to believe such premises He held intuitions that a person has in everyday life the common sense philosophy We cannot be certain yet we claim to know many things Moore also purports that the external world is real and he tried to prove it Moore 1993a His argument goes as follows P1 Here is one hand P2 Here is another C1 There are at least two external objects in the world C2 Therefore an external world exists He argues that he had the experience of observing his hands and reiterates that at least his hands offer the sum of two objects which at a specified time existed Ibid
