variance estimation that are commonly encountered in international large scale assessments Provides direction and stimulus for improving global educational assessment and student learning Is written by experts in the field with an international perspective Survey researchers market researchers and practitioners engaged in comparative projects will all benefit from the unparalleled breadth of knowledge and experience in large scale educational assessments gathered in this one volume

What Big Data Can Tell Us About the Psychology of Learning and Teaching Ronnel B. King,Jiesi Guo,Ching Sing

Dual Role of Microglia in Health and Disease: Pushing the Balance Towards Repair Raquel Ferreira,Liliana Bernardino,2015-07-23 Microglial cells play a vital role in the innate immune response occurring in the Central Nervous System CNS Under physiologic conditions microglia dynamically patrol the brain parenchyma and participate in the remodeling of active neuronal circuits Accordingly microglia can boost synaptic plasticity by removing apoptotic cells and by phagocytizing axon terminals and dendritic spines that form inappropriate neural connections Upon brain and spinal cord injury or infection microglia act as the first line of immune defense by promoting the clearance of damaged cells or infectious agents and by releasing neurotrophins and or proneurogenic factors that support neuronal survival and regeneration Recently two main pathways were suggested for microglia activation upon stimuli Classical activation is induced by Toll like receptor agonists and Th1 cytokines and polarizes cells to an M1 state mainly leading to the release of TNF alpha IL 6 and nitric oxide and to grave neural damage Alternative activation is mediated by Th2 cytokines and polarizes cells to an M2a state inducing the release of antiinflammatory factors These findings have further fueled the discussion on whether microglia has a detrimental or beneficial action M1 or M2 associated phenotypes respectively in the diseased or injured CNS and more importantly on whether we can shift the balance to a positive outcome Although microglia and macrophages share several common features upon M1 and M2 polarizing conditions they are believed to develop distinct phenotypic and functional properties which translate into different patterns of activity Moreover microglia macrophages seem to have developed a tightly organized system of maintenance of CNS homeostasis since cells found in different structures have different morphology and specific function e g meningeal macrophages perivascular macrophages choroid plexus macrophages Nevertheless though substantial work has been devoted to microglia function consensus around their exact origin their role during development as well as the exact nature of their interaction with other cells of the CNS has not been met This issue discusses how microglial cells sustain neuronal activity and plasticity in the healthy CNS as well as the cellular and molecular mechanisms developed by microglia in response to injury and disease Understanding the mechanisms involved in microglia actions will enforce the development of new strategies to promote an efficient CNS repair by committing microglia towards neuronal survival and regeneration

Teachers' Expectations, Challenges and Problems with Grade 7 Science in the K-12 Curriculum in the Philippines Emelie Idulsa,2022-01-05 Master s Thesis from the year 2017 in the subject Didactics Biology grade 10 course Master of Arts in Education language English abstract The study assessed

the teachers expectations problems and challenges with Grade 7 Science in the K 12 Basic Education Curriculum It also examines what assistance is provided by the administrators The study was conducted in two National High Schools in the Philippines for the school year 2015 2016 This study used descriptive research design which employed the mixed method using questionnaire which was substantiated with the semi structured interview and focus group discussion The findings revealed that the teachers have high expectations particularly on the assessment of learning teaching strategies benefits to learners nature of the curriculum and teaching approaches for the Grade 7 Science in the K 12 Basic Education Curriculum The teachers were mostly challenged in developing instructional materials providing activities that would master the competencies or skills of the learners disciplining learners and making remedial activities The Grade 7 Science Teachers encountered problems with learners who do not submit written outputs students difficulty in expressing their ideas they do not bring materials for the experiment and they lack competence in teaching the core subjects The Administrators provided assistance to the Grade 7 Science Teachers by sending the said teachers to training and seminar providing them with worksheets on various science activities from LRMS Website internet and in the production of test papers for the summative test
