UPSC CAPF AC Central Armed Police Forces Assistant Commandant Paper I & II Guide with 12 Previous Year Solved Papers & 5 Practice Sets 3rd Edition | BSF, CRPF, CISF, ITBP, SSB , N A **Treatment for Crime** David Birks, Thomas Douglas, 2018-10-18 Preventing recidivism is one of the aims of criminal justice yet existing means of pursuing this aim are often poorly effective highly restrictive of basic freedoms and significantly harmful Incarceration for example tends to be disruptive of personal relationships and careers detrimental to physical and mental health restrictive of freedom of movement and rarely more than modestly effective at preventing recidivism Crime preventing neurointerventions CPNs are increasingly being advocated and there is a growing use of testosterone lowering agents to prevent recidivism in sexual offenders and strong political and scientific interest in developing pharmaceutical treatments for psychopathy and anti social behaviour Future neuroscientific advances could yield further CPNs we could ultimately have at our disposal a range of drugs capable of suppressing violent aggression and it is not difficult to imagine possible applications of such drugs in crime prevention Neurointerventions hold out the promise of preventing recidivism in ways that are both more effective and more humane But should neurointerventions be used in crime prevention And may the state ever permissibly impose CPNs as part of the criminal justice process either unconditionally or as a condition of parole or early release The use of CPNs raises several ethical concerns as they could be highly intrusive and may threaten fundamental human values such as bodily integrity and freedom of thought In the first book length treatment of this topic *Treatment for Crime* brings together original contributions from internationally renowned moral and political philosophers to address these questions and consider the possible issues recognizing how humanity has a track record of misguided harmful and unwarrantedly coercive use of neurotechnological solutions to criminality The *Engaging Philosophy* series is a new forum for collective philosophical engagement with controversial issues in contemporary society *Responsible Research and Innovation* Robert Gianni, John Pearson, Bernard Reber, 2018-07-27 *Responsible Research and Innovation* provides a comprehensive and impartial overview of the European Commission's Responsible Research and Innovation RRI framework including discussion of both the meaning and aims of the concept and of its practical application As a governance framework for research and innovation RRI involves four key perspectives ethical economic business legal and governance and political The book is organised into chapters covering these different dimensions The authors provide different viewpoints on these aspects in order to offer guidance from experts in the field while at the same time acknowledging the interpretative openness of the RRI frameworks

[Evolutionary Theory: Fringe or Central to Psychological Science](#) Danielle Sulikowski, 2016-08-08 The computational theory of mind which views the brain as an information processor that operates on cognitive representations is central to modern cognitive psychology and is the dominant perspective from which brain function is conceptualized and studied Evolutionary Psychology EP is the application of evolutionary theory to understanding human behaviour and cognition Unlike other core Psychology topic areas such as Personality Learning or

Developmental Psychology however EP is not defined by the subset of psychological phenomena it seeks to describe and understand It is instead defined by a specific meta theoretical perspective from which it seeks to potentially explain all psychological phenomena The central question posed by this volume is whether this over arching nature provides an opportunity for evolutionary approaches to offer an alternative meta theoretical perspective to the information processing representational view of brain function and behavior

The Closing of the Liberal Mind Kim R. Holmes, 2016-04-12 A former U S Assistant Secretary of State and currently a Distinguished Fellow at the Heritage Foundation Kim R Holmes surveys the state of liberalism in America today and finds that it is becoming its opposite illiberalism abandoning the precepts of open mindedness and respect for individual rights liberties and the rule of law upon which the country was founded and becoming instead an intolerant rigidly dogmatic ideology that abhors dissent and stifles free speech Tracing the new illiberalism historically to the radical Enlightenment a movement that rejected the classic liberal ideas of the moderate Enlightenment that were prominent in the American Founding Holmes argues that today s liberalism has forsaken its American roots incorporating instead the authoritarian anti clerical and anti capitalist prejudices of the radical and largely European Left The result is a closing of the American liberal mind Where once freedom of speech and expression were sacrosanct today liberalism employs speech codes trigger warnings boycotts and shaming rituals to stifle freedom of thought expression and action It is no longer appropriate to call it liberalism at all but illiberalism a set of ideas in politics government and popular culture that increasingly reflects authoritarian and even anti democratic values and which is devising new strategies of exclusiveness to eliminate certain ideas and people from the political process Although illiberalism has always been a temptation for American liberals lurking in the radical fringes of the Left it is today the dominant ideology of progressive liberal circles This makes it a new danger not only to the once venerable tradition of liberalism but to the American nation itself which needs a viable liberal tradition that pursues social and economic equality while respecting individual liberties
