

How to Select the Right G-codes

- **When reporting**, select the functional limitation that *most closely* relates to the primary functional limitation being treated, or the main reason for treatment
- With more than one functional limitation, the therapist may need to *determine* which functional limitation is **primary**
- The “Other PT/OT/SLP” functional G-codes are used when the other four categories *do not describe* the patient’s functional limitation
- Only **one** functional limitation shall be *reported* at a time
 - Two functional limitation categories can be reported consecutively, but not concurrently
