Authored by world recognized experts      **Scientific Approaches to Clinical Neurology** Eli S. Goldensohn, Stanley H. Appel, 1977      **Contemporary Medical-surgical Nursing** Rick Daniels, Laura John Nosek, Leslie H. Nicoll, 2006-08

Contemporary is not only the first word in the title but a key descriptor in this book's approach. The first new med surg book to enter the market in years. Contemporary Medical Surgical Nursing is a new and exciting text that presents comprehensive nursing care of the medical surgical client as opposed to simply treating conditions and illnesses. Written with a focus on acute and collaborative care, this text is designed to be relevant and pragmatic in its approach by providing learner-oriented, logically organized information. It addresses key topic areas of clinical care, highlighting contemporary nursing approaches such as health care trends, health costs and benefits, law and ethics, and cultural considerations. Contemporary Medical Surgical Nursing helps bridge the gap from nursing student to professional by providing learners with the knowledge and skills that support today's nursing practice. Available as one comprehensive book or in two volumes.      **Clinical Neurology** Roger P. Simon, Michael Jeffrey Aminoff, David A. Greenberg, 1999. All the major clinical areas of neurology are covered using a systems approach. From cell neurophysiology to the gross anatomy and physiologic correlates, the book covers the relevant clinical neurology. As an introduction, it serves as a good bridge between the basic science and the world of clinical neurology. Particularly helpful are the clinical vignettes in each chapter that reinforce the clinical relevance of the basic science material presented.      **Neurology & Neuroscience** Richard T. Johnson, 2001      Clinical Neurology of Aging Martin L. Albert, 1984. This thorough revision of a well-established text presents essential information on the neurobiology of aging. There are new chapters on competency and ethics, problems of daily living, psychopharmacology, and stability and falls. Written in an accessible style, this book will be invaluable to clinicians and neurologists who treat elderly patients.

*Pathophysiology with Practical Applications* Phyllis L. Chowdry, 1993. This is a textbook for a one semester course in pathophysiology that serves sophomore and junior students with paramedical interests. The first unit deals with fluid and electrolyte balance, and the subsequent eight units are concerned with disease processes involving the major systems of the body. Each unit includes a brief review of anatomy and physiology that precedes a discussion of the pathophysiology of a body system.      Contemporary Literary Criticism Jeffery Hunter, 2005-04. Each volume profiles about six to eight novelists, poets, playwrights, short story writers, and other creative and nonfiction writers who are currently active or who died after Dec 31, 1999. A biographical and critical introduction to each author prefaces a collection of reprinted critical essays and reviews. A cumulative title index to the entire series is available separately included in subscription.      Diseases of the Nervous System Arthur K. Asbury, Guy M. McKhann, W. Ian McDonald, 1992.
