A Longitudinal Study of Mathematical Achievement in the Primary School Years: Curriculum and Socio-economic Comparisons and Predictions from Previous Achievement Irene Rosenthal-Hill, 1971 **First in the Class?** Elizabeth U. Cascio, Diane Whitmore

Schanzenbach, 2007 We estimate the effects of having more mature peers using data from an experiment where children of the same age were randomly assigned to different kindergarten classrooms Exploiting this experimental variation in conjunction with variation in expected kindergarten entry age to account for negative selection of older school entrants we find that exposure to more mature kindergarten classmates raises test scores up to eight years after kindergarten and may reduce the incidence of grade retention and increase the probability of taking a college entry exam These findings are consistent with broader peer effects literature documenting positive spillovers from having higher scoring peers and suggest that contrary to much academic and popular discussion of school entry age being old relative to one s peers is not beneficial
