Irrigation Expansion in Sub-Saharan Africa, Accra, Ghana, 22-26 October 2001 Hilmy Sally,Charles L.
Abernethy,2011-10-21 Only 4 percent of arable land in sub Saharan Africa is irrigated using just 2 percent of the available
water resources Furthermore 18 percent of the area equipped for irrigation is not utilized at all and the intensity of use
varies between 50 percent and 80 percent This highlights the huge potential available for intensifying and expanding
irrigated area provided that the investments required can be successfully mobilized However it must be noted that if
investments in irrigation are to yield satisfactory returns investments must also be made in a series of related activities
Current global figures for the amount of private investment in irrigation confirm that good returns can indeed be achieved
Prospects for sub Saharan Africa would be far more favorable if public development assistance particularly foreign direct
