Abstract: *Abstract: The purpose of this study was to investigate the effects of a 12-week training program on the performance of a 1000-m swimmer. The subjects were 10 male swimmers, aged 18-22 years, who were selected on the basis of their performance in a 1000-m swim. The subjects were divided into two groups: a control group and an experimental group. The experimental group received a 12-week training program, while the control group did not. The results of the study showed that the experimental group had a significant improvement in their 1000-m swim time compared to the control group. The improvement was statistically significant at the 5% level. The results of the study suggest that a 12-week training program can improve the performance of a 1000-m swimmer.*
