Best Practices in Social Studies Assessment Mark Pearcy, 2017-03-01 The importance of social studies assessment is beyond question The National Council of the Social Studies C3 Framework recognizes the importance of high quality assessments its major objective a deep understanding of the sociocultural world has as its underpinning the idea that students must be able to investigate the world and that teachers much be able to assess their understanding of it However there is a comparative dearth of research that focuses on effective social studies assessment particularly with regard to the impact of teacher practice on the development of best practices Such research is vital to moving social studies away from an emphasis on testing and more towards using assessment as a means of educating our students In *Best Practices of Social Studies Assessment* we focus on an essential question what is an effective assessment Helping teachers develop practical creative curriculum appropriate strategies is essential especially in an era in which teachers are faced with the dilemma of creating inquiry based assessments in the midst of preexisting regimes of standardized summative assessments In this volume research conducted between university professors and working teachers is described focusing on innovative assessment practices These practices include role playing activities depicting historical events Socratic seminars revolving around public policy issues collaborative student projects on a wide range of social inquiries including the implementation of UN programs and the promotion of critical thinking and writing skills on subjects as diverse as school violence and the impact of imperialism These adaptive assessments highlight the essential role of the teacher in creating assessments that blend higher order critical thinking complex content knowledge and an understanding of their own students The strategies described in this volume focus on the ability of expert educators to acknowledge the structures power and consequences of high stakes testing regimes while simultaneously designing and sustaining classroom assessment methods that embody the social participatory nature of learning and reflect research on effective practice p 289 The volume also describes the shared characteristics of the teachers who created these assessments especially their emphasis on self reflection and student autonomy as well as their professional willingness to take on challenges associated with performance based assessments even in the face of institutional pressures and external demands

Global Activism, Global Media Wilma de Jong, Martin Shaw, Neil Stammers, 2005-02-20 Radical political activist movements are growing all the time Activist politics have come to influence mainstream politics over fundamental issues such as trade gender relations the environment and war This book brings together activists and academics in one volume to explore the theory and practice of global activism s relation to all forms of media mainstream and otherwise The contributors examine how global activism is represented in the mainstream press and explain the strategies that activists adopt to spread their own ideas Investigating Indymedia and internet activism they show how transformations in communications technology offer new possibilities and explain how activists have successfully used and developed their own media Case studies and topics include the world social forums an example of a

campaign from the NGO Action Aid a campaign strategy from an internet activist Greenpeace and the Brent Spar conflict the World Development Movement and representations in the mainstream press the Independent Media Centre transgender activism on the net Amnesty International Oxfam and the internet

Democracy's Discontent and Civic Learning
Charles S. White, 2018-09-01 Around the globe democracy is under assault For a dozen years global freedom has followed a downward slope according to Freedom House Once viewed as the world's model of freedom the United States has slipped in world ratings of democracy For a rising portion of the world's population faith in democracy is flagging At the same time a wave of nationalism and xenophobia is rising in the West questioning democracy's ability to meet the needs of its citizens The contributors to this volume examine democracy's discontent from a variety of perspectives What forces have produced the extreme partisanship and polarization roiling America's civic life and politics How has today's populist movement challenged democratic norms and institutions What role has social media played in democracy's discontent and its defense How do we overcome persistent racism in the face of emboldened White supremacist and anti immigrant agitation Across the pages of this book teachers teacher educators and education policy makers will recognize a common theme in responding to democracy's discontent the need to rebuild the nation's civic infrastructure Research on best practices in civic learning and engagement serve as a guide to transforming how we prepare citizens for democratic deliberation and civic action Creative and effective teaching materials and approaches await only the will to invest the needed time and support Repairing our civic infrastructure will help to restore confidence in our civic capabilities and trust in our ability to work together for the public good Without a serious recommitment to the civic mission of schools the nation will be ill prepared to defend against those within and beyond our borders who are intent on undermining democracy

Tangible Interactive Systems Guy André Boy, 2016-04-21 Distinguishing between tangible user interfaces TUI and tangible interactive systems TISs this book takes into account not only the user interfaces but also looks at how interaction can be enabled by using digital information through the physical environment TISs go far beyond the concept of tangible user interfaces addressing large complex systems in the framework of human centred design and putting the human at the center of the design process from the start How can human centered designers grasp the real world with computers This question is explored by looking at concepts such as innovation complexity flexibility maturity stability sustainability and art to see whether we can assess both physical and figurative tangibility during the design process before product delivery Concepts like creativity design thinking and team spirit are fundamental to TIS's human centered design and are presented together with human systems integration HSI agile development and formative evaluations to build a greater understanding of this new area of research Tangible Interactive Systems would be an essential read to designers academics and other professionals concerned with product design within HCI industrial design virtual engineering and other related areas
