Conflict Inflation Maria Cristina Barbieri Góes, Sylvio Kappes, Louis-Philippe Rochon, 2025-03-11 This book brings together distinguished scholars who analyze the recent resurgence of inflation from the point of view of conflict among social classes over the appropriate distribution of income For the better part of the past four decades inflation remained low and stable in most industrialized economies certainly close to the various inflation targets As a result inflation did not pose much of a policy threat and economists' attention was drawn elsewhere Since 2020 however the picture is very different A pandemic followed by a war has led to a surge in inflation throughout the globe the result of war climate change emergencies supply chain deficiencies and other cost related post COVID problems so called greedflation This surge in inflation has left

many economists bewildered Post Keynesians however have proposed a sound explanation For them inflation is always and everywhere a conflict phenomenon and they have applied this view to the post pandemic era This book is a must read to understand not only inflation in normal times but also in times of crises It is an essential read for students policymakers and scholars in the fields of economics social sciences and public policy The chapters in this book were originally published as a special issue of Review of Political Economy
