Intra-Africa Student Mobility in Higher Education Chika Trevor Sehoole, Jenny J. Lee, 2022-01-01 This book examines student mobility within Africa International student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North **The Uganda Gazette** Uganda, 2018-07-13 International Perspectives of Distance Learning in Higher Education Joi L. Moore, Angela Benson, 2012-03-16 This book written by authors representing 12 countries and five continents is a collection of international perspectives on distance learning and distance learning implementations in higher education The perspectives are presented in the form of practical case studies of distance learning implementations research studies on teaching and learning in distance learning environments and conceptual and theoretical frameworks for designing and developing distance learning tools courses and programs The book will appeal to distance learning practitioners researchers and higher education administrators To address the different needs and interests of audience members the book is organized into five sections Distance Education Management Distance Education and Teacher Development Distance Learning Pedagogy Distance Learning Students and Distance Learning Educational Tools

Transforming Research Excellence McLean, Robert ,Tijssen, Robert, Wallace, Matthew L., Kraemer-Mbula, Erika, 2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and

Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North **North-South Knowledge Networks Towards Equitable Collaboration Between** Tor Halvorsen, Jorun Nossun, 2017-02-23 Since the 1990s internationalisation has become key for institutions wishing to secure funding for higher education and research For the academic community this strategic shift has had many consequences Priorities have changed and been influenced by new ways of thinking about universities and of measuring their impact in relation to each other and to their social goals Debates are ongoing and hotly contested In this collection a mix of renowned academics and newer voices reflect on some of the realities of international research partnerships They both question and highlight the agency of academics donors and research institutions in the geopolitics of knowledge and power The contributors offer fresh insights on institutional transformation the setting of research agendas and access to research funding while highlighting the dilemmas researchers face when their institutions are vulnerable to state and donor influence Offering a range of perspectives on why academics should collaborate and what for this book will be useful to anyone interested in how scholars are adapting to the realities of international networking and how research institutions are finding innovative ways to make NorthSouth partnerships and collaborations increasingly fair sustainable and mutually beneficial *Annual Report Uganda Human Rights Commission*, 2016 **Approved Estimates of Recurrent Expenditure for the Year Ending on the ...** Uganda, 2011 Approved Estimates of Revenue and Expenditure (recurrent and Development) ... for the Year Ending on the ...
