Transforming Research Excellence McLean, Robert ,Tijssen, Robert,Wallace, Matthew L.,Kraemer-Mbula, Erika,2020-01-18 Modern day science is under great pressure A potent mix of increasing expectations limited resources tensions between competition and cooperation and the need for evidence based funding is creating major change in how science is conducted and perceived Amidst this perfect storm is the allure of research excellence a concept that drives decisions made by universities and funders and defines scientists research strategies and career trajectories But what is excellent science And how to recognise it After decades of inquiry and debate there is still no satisfactory answer Are we asking the wrong question Is reality more complex and excellence in science more elusive than many are willing to admit And how should excellence be defined in different parts of the world particularly in lower income countries of the Global South where science is expected to contribute to pressing development issues despite often scarce resources Many wonder whether the Global South is importing with or without consenting the flawed tools for research evaluation from North America and Europe that are not fit for purpose This book takes a critical view of these issues touching on conceptual issues and practical problems that inevitably emerge when excellence is at the center of science systems Emerging from the capacity building work of the Science Granting Councils Initiative in sub Saharan Africa it speaks to scholars as well as to managers and funders of research around the world Confronting sticky problems and uncomfortable truths the chapters contain insights and recommendations that point towards new solutions both for the Global South and the Global North **High quality design on a low budget** Dorothea Sommer,Janine Schmidt,Stefan Clevström,2016-03-07 This publication brings together a range of building projects from National Academic and Public Libraries from different countries of the world showing how these libraries are able to continue to provide high quality library space that is affordable in times of difficult economic circumstances We will hear about the building processes co operation with architects and engineers and how librarians and users have reacted to these new buildings **Gender and Practice** Vasilikie (Vicky) Demos,Marcia Texler Segal,Kristy E. Kelly,2019-09-30 In Gender and Practice Insights from the Field twelve chapters contribute to the creation of an accessible body of knowledge that looks to provide gender practitioners with examples of what works and what doesn t in the attainment of gender equality Research Universities in Africa Cloete, Nico,Bunting, Ian,2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been

delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa

Intra-Africa Student Mobility in Higher Education Chika Trevor Sehoole, Jenny J. Lee, 2022-01-01 This book examines student mobility within Africa International student mobility is among the central activities of higher education internationalization As the number of international students increase so do the destinations in both number and geographic diversity Historically international student mobility has followed South North and North North patterns However recent literature show the growth in North South and South South patterns of student mobility There has also been a rise in regional mobility In what is referred to in the book as intra Africa mobility the books explores and analyzes the patterns of intra Africa mobility based on seven African countries South Africa Kenya Uganda Nigeria Ghana Senegal and Egypt The editors and contributors address three central research questions Why did the students choose the country they are studying in Why did they choose the institution they are studying in What are their academic and social experiences in these countries and their respective institutions This book is the first comprehensive exploration of intra Africa student mobility in a field that traditionally centers on the Global North
