**removal: Perspectives from the social sciences and humanities** Anders Hansson, Mathias Fridahl, Miranda Boettcher, Shinichiro Asayama, 2024-07-09 Carbon dioxide removal CDR approaches are becoming increasingly central to visions of decarbonizing national economies The past few years have seen an increasing number of countries committed to net zero targets preceded by a surge of modelled 1.5°C scenarios envisioning large scale future CDR deployment The prospect of CDR deployment raises new complex socio ecological challenges and presents new deep uncertainties These complexities challenges and uncertainties cannot be investigated using solely the techno economic modelling and environmental risk assessment methods that currently dominate the construction of policy relevant knowledge on CDR Social sciences and the humanities perspectives on CDR are often restricted to instrumental tasks such as investigating public acceptance overcoming social resistance or supporting the development of integrated assessment models There is a need for more diverse investigations of CDR which include not only environmental and techno economic dimensions but also explore key societal complexities challenges and uncertainties Against this backdrop we call for submissions on CDR stemming from perspectives within the social sciences and humanities We encourage novel empirical and theoretical contributions on CDR related policy design or analyses of recent policy developments at sub national national and international levels of governance e.g. in context of climate targets and strategies climate tipping points mitigation deterrence or societal transformations **The Routledge International Handbook of Educational Effectiveness and Improvement**

**Anthropocene** C.N. Waters, J.A. Zalasiewicz, M. Williams, M.A. Ellis, A.M. Snelling, 2014-06-05 Humankind has pervasively influenced the Earth's atmosphere biosphere geosphere hydrosphere and cryosphere arguably to the point of fashioning a new geological epoch the Anthropocene To constrain the Anthropocene as a potential formal unit within the Geological Time Scale a spectrum of indicators of anthropogenically induced environmental change is considered and shown as stratigraphical signals that may be used to characterize an Anthropocene unit and to recognize its base This volume describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition These signatures include lithostratigraphical novel deposits minerals and mineral magnetism biostratigraphical macro and micro palaeontological successions and human induced trace fossils and chemostratigraphical organic inorganic and radiogenic signatures in deposits speleothems and ice and volcanic eruptions We include finally the suggestion that humans have created a further sphere the technosphere that drives global change Dynamic Agricultural Household Bio-Economic Simulator (DAHBSIM) model description Flichman, Guillermo, Belhouchette, Hatem, Komarek, Adam M., Drogue, Sophie, Hawkins, James, Chenoune, Roza, Msangi, Siwa, 2016-09-12 DAHBSIM is a dynamic bio economic model of agricultural households that was designed to be applied to a rural developing country setting for the purpose of addressing questions around the biophysical constraints to on farm agricultural productivity and the whole farm implications of alternative strategies to sustainable agricultural intensification The model links socio economic and biophysical aspects in order to better illustrate the environmental and human welfare implications of different agricultural production practices as they are influenced by policy driven changes in prices of inputs or outputs or by changes in the physical environment

**Law, Fiction and Activism in a Time of Climate Change** Nicole Rogers, 2019-08-14 The book examines the narratives of climate change which have developed and which are currently evolving in three areas law fiction and activism Narratives of climate change generated by litigants judges writers of fiction and activists are having and will have a profound effect on the way we respond to the climate change crisis Acknowledging the prevalence of unreliable narrators this book explores the reliability and significance of different forms of climate narrative The author analyses overlapping themes and points of intersection considering the recurrent motif of the trickster the prominence of the child the significance and ongoing viability of the rights discourse and the increasingly prevalent emergency framing with its multiple implications for law's empire She asks how law fiction and activism measure up as textual and performative fora for telling the story of climate change and anticipating a climate changed future And in addition how can they help foster transformative narratives which empower us to confront the climate change crisis This highly topical cross disciplinary work will be of interest to anyone concerned about the growing climate emergency and makes a valuable contribution to climate law environmental law the environmental humanities and ecocriticism **Towards an Interdisciplinary Approach in Earth System Science** Gerrit Lohmann, Helge Meggers, Vikram Unnithan, Dieter Wolf-Gladrow, Justus Notholt, Astrid Bracher, 2015-01-20 This book

describes the latest advances at the Helmholtz Earth System Science Research School where scientists from the Alfred Wegener Institute in Bremerhaven the University of Bremen and the Jacobs University are involved in research One of the greatest challenges is understanding ongoing environmental changes The longer the time scale the more components of the Earth system are involved e g interannual and decadal variations are related to the coupled atmosphere ocean sea ice system whereas longer variations like glacial interglacial or Cenozoic transitions involve the carbon cycle ice sheets and gateways In order to get deep insights into Earth system science observations remote sensing past environmental data as well as modeling need to be integrated These different approaches are traditionally taught in separated disciplines at bachelor and master levels It is therefore necessary to bring these disciplines together in PhD programs
