### **Middle School Expository Text:**

*Learning From Text Across Conceptual Domains* Cynthia R. Hynd, 2013-12-16 This volume is an attempt to synthesize the understandings we have about reading to learn. Although learning at all ages is discussed in this volume, the main focus is on middle and high school classrooms, critical spaces of learning and thinking. The amount of knowledge presented in written form is increasing, and the information we get from texts is often conflicting. We are in a knowledge explosion that leaves us reeling and may effectively disenfranchise those who are not keeping up. There has never been a more crucial time for students to understand, learn from, and think critically about the information in various forms of text. Thus, understanding what it means to learn is vital for all educators. Learning from text is a complex matter that includes student factors, social, ethnic, and cultural differences, as well as varying motivations, self-perceptions, goals, and needs, instructional and teacher factors, and disciplinary and social factors. One important goal of the book is to encourage practicing teachers to learn to consider their students in new ways, to see them as being influenced by and as influencing not just the classroom but the total fabric of the disciplines they are learning. Equally important, it is intended to foster further research efforts from local studies of classrooms by teachers to large scale studies that produce generalizable understandings about learning from text. This volume, a result of the editor's and contributors' work with the National Reading Research Center, will be of interest to all researchers, graduate students, practicing teachers, and teachers in training who are interested in understanding the issues that are central to improving students' learning from text.

*Comprehension Instruction, Second Edition* Cathy Collins Block, Sheri R. Parris, 2008-04-22 This comprehensive professional resource and text is based on cutting edge research. In each chapter, leading scholars provide an overview of a particular aspect of comprehension, offer best practice instructional guidelines, and policy recommendations, present key research questions still to be answered, and conclude with stimulating questions for individual study or discussion. Coverage includes such timely topics as differentiated instruction, technology, and reading comprehension teaching, English language learners, and the implications of current neuroscientific findings.

*Effective School Interventions, Second Edition* Natalie Rathvon, 2008-08-14 This highly practical resource and text presents 70 interventions that have been demonstrated to improve the classroom learning environment, academic achievement, and student behavior and social competence. Each intervention is presented in a brief, standardized format with step-by-step procedures that can easily be implemented by Pre-K-12 teachers and other school-based professionals. The volume includes best practice guidelines for designing, implementing, and evaluating evidence-based school interventions, as well as strategies for combining multiple interventions to create a comprehensive program at the individual class or schoolwide level.

Dwyer-Tower,2007 Abstract This study examines the effect of integrated teaching of vocabulary and main ideas and supporting details in expository text on struggling middle school students ability to write extended summaries of expository text The research was conducted in the literacy support classes in fifth and sixth grade in a suburban middle school in the Northeastern United States The teacher researcher conducted an intervention in the integration of reading and writing strategies to struggling middle school readers and writers She examined the effect of explicit teaching of declarative procedural and conditional knowledge of reading and writing strategies on students demonstration of comprehension of expository text through writing Data were collected for five writing tasks three of which were collaborative The first and last were written independently Each writing sample was scored using an analytic trait content area rubric for vocabulary and major ideas which then informed the scoring of the holistic content area rubric The teacher researcher examined the students writing samples through both quantitative and qualitative methods In addition to the pre and post study writing by the participants data from the Gates

MacGinitie vocabulary and comprehension tests were collected before and after the study Findings indicate that struggling middle school readers and writers benefit from a comprehensive approach to building their literacy skills Ninety percent of the fifth and 83% of the sixth grade participants improved either their reading or writing achievement or both The analytic trait and holistic rubrics aided students understanding of the requirements for grade appropriate writing and were effective diagnostic instructional tools to guide students awareness of their abilities in content area writing and enabled targeted individualized scaffolding of students writing The rubrics provided an effective intermediary step between the development of single paragraph and multiparagraph writing for struggling middle school students
