presented as a part of the dedication of a new clinical teaching research facility for the University of Houston College of
Optometry March 27 31 1977 These papers were intended to cover the state of the art knowledge in all areas of visual
system investigation While we may not have quite reached our goal of covering all areas the papers presented here cover a
broad cross section of investigations in vision However without doubt the intention of state of the art coverage was achieved
in all areas discussed From the beginning with the presentation of Nobel Laureate Ragnar Granit to the end with
consideration of Vision Health Care Delivery Systems each speaker was thorough in treatment of his her subject From
studies of the and of contact lenses through examination of crystalline lens function ocular pathologies and retina function
the eye is very thoroughly considered Much of this volume covers material dealing with the process of vision after coding of
information in the eye Psychophysical studies of vision compare and contrast with neurophysiological studies of visual
function and a very thorough section on the development of visual system function should prove valuable to a wide cross
section of teachers researchers and clinicians All in all the contents of this volume represent a vast array of knowledge about
the visual system and this should be a valuable teaching research resource for many years *Proceedings* Association of
