At first, because both IT as well as finance are some of the most prominent driving forces of our contemporary world. Secondly, because both areas develop with a terrific speed, causing an urgent need of up-to-date information on recent developments. Thirdly, because serious applications of IT in Finance require specialists with a professional training and professional knowledge in both areas. Over the last decades, the world has seen many changes in politics, economics, science, and legislation. The driving forces behind many of these developments are of a technological nature. One of the key technologies with this respect is Information Technology. IT is the most prominent technology revolutionizing the industrial development from products and processes to services, as well as finance, which is itself one of the central pillars of modern economics. The explosive development of the Internet emphasizes the importance of IT since it is today's key factor driving global access and availability of information and allows the division of labour on an international scale, the globalization. The profound transformation of finance and the financial industry over the last twenty years was driven by technological developments. e.g. Proceedings of the 2022 2nd International Conference on Economic Development and Business Culture (ICEDBC 2022) Yushi Jiang, Yuriy Shvets, Hrushikesh Mallick, 2023-05-11 This is an open access book.
