Handbook on China's Urban Environmental Governance Fangzhu Zhang, Fulong Wu, 2023-11-03 This Handbook addresses how Chinese cities govern environmental changes generated by fast economic growth and urbanisation. With in-depth case studies on governing waste management, climate change and energy transition, it will illuminate the relationship between the state, market and society in environmental governance. Routledge Handbook of Energy in Asia Subhes Bhattacharyya, 2017-10-12 The Routledge Handbook of Energy in Asia presents a comprehensive review of the unprecedented growth of Asian energy over the past quarter of a century. It provides insightful analysis into variation across the continent whilst highlighting areas of cross learning and regional cooperation between the developed and developing countries of Asia. Prepared by a team of leading international experts, this book not only captures the East Asian domination, particularly that of China, but also highlights the growing influence of South Asia and the ASEAN. Organised into four parts, the sections include the demand for energy in the region and its main drivers at the sector level, developments in energy supply including fossil fuels and renewable energy sources, energy policies and issues such as sector reform and climate change, the transition to a low carbon pathway. This handbook offers a complete picture of Asian energy covering supply and demand as well as contemporary challenges in the sector. As such, it is a valuable resource for students and scholars of energy policy, Environmental Studies and Asian Studies. *The Routledge Handbook of Translation and Education* Sara Laviosa, Maria González-Davies, 2019-12-06 The Routledge Handbook of Translation and Education will present the state of the art of the place and role of translation in educational contexts worldwide. It lays a sound foundation for the future interdisciplinary cooperation between Translation Studies and Educational Linguistics. By adopting a transdisciplinary perspective, the handbook will bring together the various fields of scholarly enquiry and practice that make a valuable contribution to enlarging the notion of translation and diversifying its uses in education. Each contribution provides an overview of the historical background to a given educational setting. Focusing on current research approaches and empirical findings, this volume outlines the development of pedagogical approaches, methods, assessment and curriculum design. The handbook also examines examples of pedagogies that integrate translation in the curriculum, the teaching methods approach, design and procedure as well as assessment. Based on a multilingual and applied oriented approach, the handbook is essential reading for postgraduate students, researchers and advanced undergraduate students of Translation Studies and educationalists and educators in the 21st century post global era. Chapters 4, 25 and 26 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license. **Designing Learning with Multimodality in English Medium of Education (EME) Classrooms Across Asia** Fei Victor Lim, Jack Pun, 2025-06-12 This book provides evidence based and pedagogically focused analyses of a variety of multimodal resources to scaffold learning in contexts of English Medium Education (EME) in

Asia The contributing authors are active researchers in the field of EME and multimodality across the primary secondary and tertiary levels from Hong Kong Indonesia Japan Singapore South Korea Taiwan and Thailand They explore both the latest theoretical conceptions on the design of EME by harnessing the affordances of multimodality as well as practical applications of multimodal pedagogies for the teaching and learning of specific subjects particularly STEM subjects They provide examples of EME lessons with annotated notes to showcase good practice

Incentivizing Peace Jaroslav Tir, Johannes Karreth, 2018-01-24 Civil wars are among the most difficult problems in world politics While mediation intervention and peacekeeping have produced some positive results in helping to end civil wars they fall short in preventing them in the first place In *Incentivizing Peace* Jaroslav Tir and Johannes Karreth show that considering civil wars from a developmental perspective presents opportunities to prevent the escalation of nascent armed conflicts into full scale civil wars The authors demonstrate that highly structured intergovernmental organizations IGOs such as the World Bank IMF or regional development banks are particularly well positioned to engage in civil war prevention When such IGOs have been actively engaged in nations on the edge their potent economic tools have helped to steer rebel government interactions away from escalation and toward peaceful settlement *Incentivizing Peace* provides enlightening case evidence that IGO participation is a key to better predicting and thus preventing the outbreak of civil war

Current Sino-Russian Relations. Authoritarian Symbiosis, Strategic Partnership or Fragile Intermarriage of Limited Duration? Daniel Schmidt, 2022-03-31 Bachelor Thesis from the year 2019 in the subject Politics Region Russia grade 1.0 Rhine-Waal University of Applied Sciences language English abstract In times of global political cataclysms where the old Washington-led Western liberal order is stumbling with nationalism and protectionism on the rise and old alliances being challenged a new kind of super-heavy Sino-Russian diplomatic double-star system is apparently rising in the east since 2001 Thus I dedicated this paper to the examination of the quality of contemporary Sino-Russian relations The hypothesis is that if Sino-Russian relations live up to the high level that is reiterated by their respective officials and state-sponsored media it needs to be observable that such is thoroughly beneficial for both sides' core and long-term interests Therefore I have come up with a two-tracked approach First I will quantitatively analyze i their voting behaviors at the UNSC and UNGA ii the development and composition of their bilateral trade levels and iii the two states' comparative classical indicators of strength i.e. population size GDP levels and defense spending levels Second I will qualitatively analyze how Sino-Russian relations unfold within the context of i the

military security focused SCO ii the regional economic agenda of the two concepts of EAEU and SREB and iii the multilateral global order aspirations of the BRICS and their recent process of institutionalization via the NDB and CRA My research implicates that the relationship has already passed its point closest to equilibrium with Russia becoming increasingly marginalized since Hence this thesis argues that albeit there are areas of matching interests the indicators point towards a questionable long term durability of the Sino Russian relationship
