conference at the Hague **Strands of Utopia** Michael G Kelly, 2017-12-02 The poetic is an abiding yet elusive qualification
within the discursive system of twentieth century French literature No longer amenable to formal assignment its recurrences
delimit a shifting multi layered practice of artistic and intellectual self invention This study attempts to outline certain
durable properties of that practice by confronting it with the complex theoretical and spatial metaphor of utopia Drawing in
particular upon the oeuvres of Victor Segalen 1878 1919 Rene Daumal 1908 44 and Yves Bonnefoy b 1923 it traces poetic
work work done in support of poetic difference along the social physical and textual axes of what is argued to be a sustained
and radically inclusive utopian practice within the literary field The complex utopian quality of poetic work is linked to the
cultural persistence of the poetic as a simple attribute within literary practice In uncovering this link the study encourages
revised understandings of both the poetic and the utopian in the modern French literary context The Poetics of Adonis
and Yves Bonnefoy Kareem James Abu-Zeid, 2021-06-15 This book examines the work of two major poets who wrote in the
second half of the twentieth century Yves Bonnefoy of France and the Syrian born Adonis born Ali Ahmed Said In conducting
close readings of key moments from their respective poetry the author illustrates how both of these writers in their own
unique ways construct poetry as a form of spiritual practice that is as a way of transforming both the poet's and the implied
reader's ontological perceptual and creative relationships with their internal and external worlds Between Theory and
Observations Steven Wepster, 2009-11-11 In the 18th century purely scientific interests as well as the practical necessities of
navigation motivated the development of new theories and techniques to accurately describe celestial and lunar motion
Between Theory and Observations presents a detailed and accurate account not to be found elsewhere in the literature of
Tobias Mayer's important contributions to the study of lunar motion including the creation of his famous set of lunar tables
which were the most accurate of their time *Chrestomathie Persane* École Spéciale des Langues Orientales Vivantes,
