is to establish the co operative communication strategies that are used in air traffic control ATC conversations The research
deals with the question what kind of co operative communication strategies do pilots and controllers employ in a speech
situation with a restricted use of vocabulary which generally does not permit any deviations from standard phraseology The
strategies in ATC speech are then compared to those used by second language learners Faerch and Kasper s 1983 taxonomy
of communication strategies will serve as a basis for this comparison The author analyses authentic speech samples from
various ATC workstations at Zurich Airport and evaluates various aspects of phraseology training of air traffic controllers
