S'il y a des exigences de nature formelle en particulier réglementaires scientifiques et techniques il y a également des exigences conceptuelles. Ces dernières sont issues de la réflexion menée sur la pratique infirmière les enjeux qui y sont associés la vision éthique dans laquelle on souhaite inscrire la dynamique que l'on décide de lui insuffler en vue de la voir se développer de l'affiner sans négliger l'indispensable complémentarité avec les autres professionnels ainsi que l'harmonie de ce qu'ensemble ils mettent en œuvre. Si la démarche qualitative nécessite de satisfaire des exigences formelles Walter Hesbeen montre ici toute l'ambition qui devrait également l'animer en vue d'une pratique quotidienne riche humainement juste et ce titre singulier subtile sensible et créative. Pour l'auteur il s'agit de prendre en compte deux composantes essentielles. La première est la volonté de faire exister le patient et ses proches en tant que sujets dans la relation de soin et d'agir sur tout ce qui favorise une telle volonté ou qui pourrait l'empêcher. La seconde est la nécessité de développer une véritable éthique de l'organisation afin de proposer tant aux professionnels qu'à la population des atmosphères apaisantes pour des pratiques performantes mais aussi et surtout humainement pertinentes. Agir pour la qualité du soin infirmier consiste ainsi non seulement veiller à la conformité par rapport aux aspects formels mais également oser une ambition qui précise la perspective dans laquelle on veut inscrire la pratique infirmière et qui témoigne de la prise en compte de la dignité des personnes soignées. C'est parce que le souci de la dignité concerne chacun dans sa pratique du quotidien que cet ouvrage s'adresse tous les professionnels et étudiants de la santé en recherche d'un soin de qualité. **Data protection in the context of covid-19. A short (hi)story of tracing applications** Elise Poillot, Gabriele Lenzini, Giorgio Resta, Vincenzo Zeno-Zencovich, 2021-11-13 The volume presents the results of a research project named Legafight funded by the Luxembourg Fond National de la Recherche in order to verify if and how digital tracing applications could be implemented in

the Grand Duchy in order to counter and abate the Covid 19 pandemic This inevitably brought to a deep comparative overview of the various existing various models starting from that of the European Union and those put into practice by Belgium France Germany and Italy with attention also to some Anglo Saxon approaches the UK and Australia Not surprisingly the main issue which had to be tackled was that of the protection of the personal data collected through the tracing applications their use by public health authorities and the trust laid in tracing procedures by citizens Over the last 18 months tracing apps have registered a rise a fall and a sudden rebirth as mediums devoted not so much to collect data but rather to distribute real time information which should allow informed decisions and be used as repositories of health certifications DOI 10 13134 979 12 5977 055 4 Service public, services publics Pierre Bauby,2011 Revue des cours littéraires de la France et de l'étranger ,1928
