

# Parts of a Plant

## Preschool–Kindergarten

### Objectives

- Students will identify the parts of a plant and how plants grow.
- Students will determine what plants need to survive.

### Materials Needed

- Package of carrot seeds
- *The Carrot Seed* by Ruth Krauss
- Parts of a Plant Diagram
- Parts of a Plant Activity Sheet
- Scissors
- Crayons
- Glue

### Introduction

Gather children together for circle time and give one carrot seed to each child. (Don't tell them what kind of seed it is!) Ask them to share their thoughts on what the seed will turn into after it is planted. Encourage them to make as many guesses as they want to.

Tell students you are going to read a story about a boy who has the same kind of seed they are holding. Invite them to pay close attention to how the seed changes throughout the story and what the boy does to help it grow. Encourage students to listen carefully as you read to find out what kind of seed it is!

### Procedure

1. Read *The Carrot Seed*. Be careful not to reveal the title or show the book cover until after you have read the story!
2. After you have finished—and the carrot has been revealed—reread the story and invite students to repeat the phrase, "I'm afraid it won't come up!"
3. Next, ask students to think back on the story and identify what it was that the little boy did to help the carrot seed grow into a carrot (planted it in soil, watered it, cared for it, made sure it had plenty of sunlight, etc.).
4. Print out the Parts of a Plant Diagram and display it for students. Prompt students to repeat after you as you name and point to each part. Write in the name of each part as you go.

### Guided/Independent Practice

1. Give each student a copy of the Parts of a Plant Activity Sheet and review the four words in the boxes at the bottom of the page: *leaves*, *roots*, *seed* and *stem*.
2. Instruct students to color the picture and to cut out the labels on the bottom of the page and glue them onto the top of the page to correctly label the parts of the plant.
3. Circulate around the room to supervise students or to provide assistance with cutting as needed.
4. Once students have finished, review the parts of the plant together by saying them aloud as students point to their diagrams.

Dexheimer, 1914 **Developing Independent Learning In Science: Practical Ideas And Activities For 7-12 Year Olds** Lakin, Liz, 2013-08-01 This practical guide to promoting and developing independent learning is presented in a mixed format using both diagrammatic and textual stimulus. It offers tips and suggestions to achieve effective teaching and learning and raises standards by enabling the pupil to become independent and responsible for their own learning, autonomous in their thinking and creative and critical in their understanding. Liz Lakin describes a progression away from dependency on the classroom teacher whose role changes readily from teacher to facilitator. Drawing on practice based research she introduces the skills and processes associated with independent learning through established strategies such as Assessment for Learning, the use of Active learning techniques, problem solving activities and peer assessment. Each chapter presents tried and tested ideas, strategies and activities for the development of higher order skills such as application, synthesis, evaluation and reflection to use with pupils across the dependency spectrum. Several relate to the higher levels of attainment and are therefore applicable at Key Stage 3. The effectiveness of teacher/pupil feedback and the role of homework form a significant focus for the latter part of the book. A truly thought provoking interactive book with a difference that takes teachers on a learning journey. It encourages us to reflect on how we learn, how our pupils learn and what the collective implications for effective teaching and helping pupils to construct their learning are. Reading and actively engaging with this book is indeed a learning journey invaluable to practitioners. The text contains many invaluable references and deals with topics such as the value of homework, how people learn and how people respond to techniques addressed to them in learning situations. An essential reading for practicing teachers and particularly students in training and their tutors. Dr Sue Dale Tunnicliffe, Senior lecturer in Science Education, Institute of Education, University of London, UK. There has never been a time when independent learning is more important in school science. In *Developing Independent Learning in Science* Liz Lakin challenges the reader to examine how they teach science and why pupils respond as they do. The result is a book that should be of great value to those who teach science to 7-12 year olds and to science educators in general. A particular strength is the way the author interweaves rigorous thinking about learning with activities for the reader to help them engage with the text. In addition there is a mass of useful thinking in here and plenty of classroom

suggestions The book is worth reading simply for the honesty of the How not to climb Helvellyn case study Michael J Reiss Professor of Science Education Institute of Education University of London UK In this book Liz Lakin involves the readers in the kind of independent learning that she is describing and advocating It should enable practising teachers to stand back from their work to consider why we want children to learn in a certain way as well as providing useful ideas about how to do it It is written in a personal and engaging style and is a unique addition to books on science teaching Wynne Harlen OBE PhD Visiting Professor of Education University of Bristol UK The Classroom Teacher Milo Burdette Hillegas, Thomas Henry Briggs, 1927 **A Conduct Curriculum for the Kindergarten and First Grade** Agnes Burke, Edith Underwood Conard, Alice Dalgliesh, Edna V.
