

Perspective

- Perspective is a drawing method that shows how objects appear to get smaller as they get further away;
- Objects are drawn disappearing towards 'Vanishing Points';
- Vanishing Points are located on a 'Horizon Line' (or 'Eye Level Line'). This is an imaginary line, level with the viewer's eyes;
- Objects drawn above the eye level line appear as if you are looking up at them; those below the eye level line appear as though you are looking down upon them.

ONE POINT PERSPECTIVE

- Lines converge towards one vanishing point;
- Generally used when looking down something long, like a road or corridor;
- Front and back face of the object appear 'flat' or 'front on';
- Sides, top and bottom of objects converge towards vanishing points.

TWO POINT PERSPECTIVE

- Two vanishing points are used, both located on the Horizon Line;
- All lines (except curving or irregular lines) are drawn as either vertical, or going towards the vanishing points;
- This is a very realistic drawing method.
