

MARK SCHEME for the May/June 2012 question paper
for the guidance of teachers.

0452/12

0452 ACCOUNTING

Paper 1, maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking begins, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter the discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, AICE, Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Krämer,2021-06-29 The economy of the 21st century in the OECD countries and in China is characterized by a new phenomenon the structural surplus of private savings in relation to private investment This is true even in a situation of prosperity and very low interest rates On the one hand this excess saving is due to people s increasing inclination to save in light of rising life expectancy driven by the desire to have sufficient assets in old age On the other hand the demand for capital is not increasing to the same extent so that investment is not keeping pace with the rising desire to save The resulting gap between the private desire for wealth and private investment can only be closed by increasing public debt This open access book offers a new capital theoretical perspective on the macroeconomic relationship between desired wealth and investment and it presents new empirical data on private wealth and its composition in the OECD plus China area The authors argue that a free economic and social order can only be stabilized if the wealth aspirations of individuals are met under conditions of price stability This is not possible without substantial net public debt A new way of thinking about the economy as a whole is required By way of an in depth theoretical and empirical analysis the book demonstrates this new way of thinking and describes the current challenges facing economic policy It will appeal to economists and students of economics who are interested in macroeconomic theory and its economic policy implications An impressive and convincing theoretical dive into the fundamentals behind secular stagnation with very strong implications for actual debt policy Public debt may be needed to improve welfare Olivier Blanchard Senior Fellow at the Peterson Institute for International Economics and Professor of Economics Emeritus at Massachusetts Institute of Technology MIT Chief Economist at the International Monetary Fund from 2008 to 2015 **Saving and Investment in the Twenty First Century** gives a wholly new perspective on macroeconomics Weizs cker and Kr mer describe a simple practical solution to the underemployment that has plagued Southern Europe for more than a decade George Akerlof Nobel Laureate in Economics 2001 Professor at the McCourt School of Public Policy at Georgetown University and Professor of Economics Emeritus at the University of California Berkeley This is a profound and original contribution that can help us to understand and act on the great issues of our times Nicholas Stern Grantham Research Institute on Climate Change and the Environment at the London School of Economics Author of the Stern Review Report on the Economics of Climate Change Chief Economist at the World Bank from 2000 to 2003 **6** BPP Learning Media,2012-12-01 A Core Study Text for the ATT Qualification **Discrimination, Vulnerable Consumers and Financial Inclusion** Cătălin-Gabriel Stănescu,Asress Adimi Gikay,2020-12-28 This book addresses the questions of discrimination

vulnerable consumers and financial inclusion in the light of the emerging legal socioeconomic and technological challenges New technologies such as artificial intelligence driven consumer credit risk assessment and Fintech platforms the changing nature of vulnerability due to the ongoing COVID 19 pandemic as well as the sophistication of digital technologies which help circumvent legal barriers and protections necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges Organized in two major parts the first addresses from multiple national angles the idea of a human rights approach to consumer law in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt induced servitude The second tackles the challenges posed by increased usage of technology in connection with financial services which tends to solve but also creates additional issues for consumers in general and for vulnerable groups in particular
