This book will be a useful reference for all the readers in this important and growing field of research and will contribute to the roadmap of future mHealth systems and improve the development of effective healthcare delivery systems.

**mHealth** Donna Malvey, Donna J. Slovensky, 2014-08-31 This book defines the phenomenon of mHealth and its evolution, explaining why an understanding of mHealth is critical for decision makers, entrepreneurs, and policy analysts who are pivotal to developing products that meet the collaborative health information needs of consumers and providers in a competitive and rapidly changing environment. The book examines trends in mHealth and discusses how mHealth technologies offer opportunities for innovators and entrepreneurs, those who often are industry first movers with regard to technology advancement. It also explores the changing dynamics and relationships among physicians, patients, insurers, regulators, managers, administrators, caregivers, and others involved in the delivery of health services. The primary focus is on the ways in which mHealth technologies are revising and reshaping healthcare delivery systems in the United States and globally and how those changes are expected to change the ways in which the business of healthcare is conducted. mHealth Transforming Healthcare consists of nine chapters that address key content areas including history to the extent that dynamic technologies have a history, projection of immediate evolution, and consistent issues associated with health technology such as security and information privacy and government and industry regulation. A major point of discussion addressed is whether mHealth is a transient group of products and a passing patient encounter approach or if it is the way much of our health care will be delivered in future years with incremental evolution to achieve sustainable innovation of health technologies.

**mHealth Ecosystems and Social Networks in Healthcare** Athina A. Lazakidou, Stelios Zimeras, Dimitra Iliopoulou, Dionysios-Dimitrios Koutsouris, 2015-12-16 This book provides a principled approach to classification using the available data in a model which combines information from the social network and the healthcare models.
