Artificial Intelligence-of-Things (AIoT) in Precision Agriculture Yaqoob Majeed, Longsheng Fu, Long He, 2024-02-12 The merging of Artificial Intelligence AI and Internet of Things is known as Artificial Intelligence of Things AIoT IoT consists of interlinked computing devices and machines which can acquire transfer and execute field industrial operations without human involvement while AI processes the acquired data and helps extract the required information The technologies work in synergy AI enriches IoT through machine learning and deep learning based data analysis and learning capabilities whereas IoT enriches AI through data acquisition connectivity and data exchange Precision agriculture is becoming critically important for sustainable food production to meet the growing food demand In recent decades AI and IoT techniques have played an increasing role within industrial operations e g autonomous manufacturing automated supply chain management predictive maintenance smart energy grids smart home appliances and wearables however agricultural field operations are still heavily dependent on human labor This is because these operations are ill defined unstructured and susceptible to variation in natural conditions e g illumination landscape atmosphere plus the biological nature of crops fruits stems leaves and or shoots continuously change their shape and or color as they grow

**Smart Product Engineering** Michael Abramovici, Rainer Stark, 2013-03-14 The collection of papers in this book comprises the proceedings of the 23rd CIRP Design Conference held between March 11th and March 13th 2013 at the Ruhr University Bochum in Germany The event was organized in cooperation with the German Academic Society for Product Development WiGeP The focus of the conference was on Smart Product Engineering covering two major aspects of modern product creation the development of intelligent smart products as well as the new smart approach of engineering explicitly taking into account consistent systems integration Throughout the 97 papers contained in these proceedings a range of

topics are covered amongst them the different facets and aspects of what makes a product or an engineering solution smart In addition the conference papers investigate new ways of engineering for production planning and collaboration towards Smart Product Engineering The publications provide a solid insight into the pressing issues of modern digital product creation facing increasing challenges in a rapidly changing industrial environment They also give implicit advice how a smart product or engineering solution processes methods and tools needs to be designed and implemented in order to become successful

*The Booklist* ,1918      **A.L.A. Booklist** ,1919      **Design and Construction of Smart Cities** Ibrahim El Dimeery,Moustafa Baraka,Syed M. Ahmed,Amin Akhnoukh,Mona B. Anwar,Mahmoud El Khafif,Nagy Hanna,Amr T. Abdel Hamid,2021-01-23 This book focuses on how to maintain environmental sustainability as one of its main principles and it addresses how smart cities serve to diminish wastes and maintain natural resources by having clean green energy that is operated by new smart technology designs Living in a smart city is not something of the future anymore it is here and it is being implemented all over the world A smart city uses different types of electronic Internet of things IoT sensors to collect data and then use these data to manage assets and resources efficiently The smart city concept integrates information and communication technology ICT and various physical devices connected to the IoT network to optimize the efficiency of city operations and services and achieve sustainable solutions to allow us to grow with proper management of our resources Smart sustainable structures and infrastructures face the need of urban areas due to the growth of populations while in the same time save our environment To achieve this we need to revisit the conventional methods in design and construction and the conventional materials which are used now to optimize the design and provide smart solutions In the past few years the consumption of resources has been massive and the waste produced from that consumption has been inconceivable This is causing environmental degradation which produces many environmental challenges such as global climate change excessive fossil fuel dependency and the growing demand for energy As well as discussing the challenges facing the civil engineering design and construction of smart cities components and presenting concepts and insight from experts and researchers from different civil engineering disciplines this book explains how to construct buildings and special structures and how to manage and monitor energy

*Booklist* ,1919      **Mining Manual** ,1897      **Leveraging Phenotyping and Crop Modeling in Smart Agriculture** Ting Sun,Wenyu Zhang,Syed Tahir Ata-Ul-Karim,Yuntao Ma, Liujun Xiao,2025-08-20 In recent years the agriculture sector has witnessed a significant transformation due to the integration of digital technologies and data driven methodologies leading to the emergence of smart agriculture Advanced agricultural technologies notably high throughput phenotyping and crop modeling have fundamentally altered our understanding and management of crops Phenotyping allows for precise characterization of plant traits while crop modeling provides predictive insights into crop growth and yield based on a diverse set of environmental parameters In many contexts phenotyping and modeling are closely intertwined phenotypic data forms the foundation for modeling and models offer quantifiable tools for analyzing complex traits The convergence of

these domains presents an exciting opportunity to optimize agricultural practices enhance resource efficiency and make substantial contributions to global food security This research topic aims to seamlessly integrate phenotyping and modeling essential components in smart agriculture to address urgent challenges like sustainable food production amidst a growing global population and to optimize resource utilization The key challenge is the fragmented use and insufficient integration of high throughput phenotyping and advanced crop modeling The cohesive fusion of these technologies can revolutionize crop management offering predictive analytics for optimized resource allocation enhanced productivity and environmental sustainability Recent strides in sensor tech machine learning and computational modeling provide a strong foundation for a refined integration of phenotyping and modeling enabling real time data driven decisions for farmers This research strives to bridge the gap between phenotyping and crop modeling aiming for a transformative approach in smart agriculture to ensure sustainability and food security

**NMR in Plants and Soils** Andreas Pohlmeier,Siegfried Stapf,Sabina

Haber-Pohlmeier,2025-07-18 Processes in soils with special focus on plant soil interaction are hot economic and social topics driven by climate change and its impact on human nutrition Following the pioneering work in the 1980s and early 1990s nuclear magnetic resonance NMR magnetic resonance imaging MRI and mobile technologies have become important research methods in this area This book highlights NMR in the space and time domains as a non invasive and versatile method for elucidating processes in plants soils and their interactions The field is currently undergoing rapid development driven on the one hand by the increasing pressure to contribute to food security and on the other hand by the increasing availability of new technologies The book makes the methods accessible to non NMR specialists and conversely promotes the further development of NMR and MRI from the user s perspective It opens with a section reviewing the essential NMR and MRI basics for plants and soils and revisits the first investigations from the 1980s Section two then covers NMR and MRI of soils and soil materials while the third section deals with the study of plants and plant products The focus in both areas is the new development of mobile NMR devices from centimetre to field scale which enables the investigation of plants and soils in situ In addition the coupling of MRI with numerical soil and plant physical models is highlighted With editors and authors contributing the state of the art of plant and soil NMR and MRI this book defines the potential applications for researchers looking at how these new topics can enhance their research and understanding in the coming decades
