Artefacts, Archives, and Documentation in the Relational Museum Mike Jones, 2021-07-14 Artefacts Archives and Documentation in the Relational Museum provides the first interdisciplinary study of the digital documentation of artefacts and archives in contemporary museums while also exploring the implications of polyphonic relational thinking on collections documentation Drawing on case studies from Australia the United Kingdom and the United States the book provides a critical examination of the history of collections management and documentation since the introduction of computers to museums in the 1960s demonstrating how technology has contributed to the disconnection of distributed collections knowledge Jones also highlights how separate documentation systems have developed managed by distinct increasingly professionalised staff impacting our ability to understand and use what we find in museums and their ever expanding online collections Exploring this legacy allows us to rethink current practice focusing less on individual objects and more on the rich stories and interconnected resources that lie at the heart of the contemporary plural participatory relational museum Artefacts Archives and Documentation in the

evolution by natural selection in his book *On Naval Timber and Arboriculture* and did so before Charles Darwin and Alfred Wallace claimed to independently replicate it in 1858. Unjustly and against the Arago convention on priority, a ruling that gives origination of any science theory to the first to publish, Matthew has been illicitly denied his priority on the grounds he never influenced anyone with his breakthrough. Today Big Data research has uncovered Darwin's science fraud by plagiarism, revealing evidence which proves beyond all reasonable doubt that he and Alfred Wallace both independently plagiarised the theory of evolution by natural selection from Patrick Matthew. Books have been newly unearthed in the publication record to show that at least 30 people cited Matthew's work in published literature before 1858 and that several were known influencers of Darwin's and Wallace's work in the field. Additionally, several people in Darwin's and Wallace's social circles were first to be second into print using original terms coined by Matthew in his bombshell breakthrough book. This book reveals all the newly unearthed data and essentially explains it alongside the deplorable treatment of Patrick Matthew in scholarly historical context. Dr Mike Sutton further reveals using social science participatory observation methods and experimental results how members of the so-called Darwin Industry enabled and facilitated by the deliberate publication of falsehoods and other grossly misleading editing on Wikipedia have disgracefully worked to re-bury these newly unearthed facts by means of knee-jerk blind sight ignorant rejection, blatant and deliberate fact denial, censorship, persistent and serious workplace harassment, obscene social media abuse, poison pen emails, lies, mischievous misrepresentation, and repeat research plagiarism.

Sex, Sexuality, Law, and (In)justice Henry F. Fradella, Jennifer M. Sumner, 2016-02-26. *Sex, Sexuality, Law and In Justice* covers a wide range of legal issues associated with sexuality, gender, reproduction, and identity. These are critical and sensitive issues that law enforcement and other criminal justice professionals need to understand. The book synthesizes the literature across a wide breadth of perspectives, exposing students to law, psychology, criminal justice, sociology, philosophy, history, and where relevant, biology, to critically examine the social control of sex, gender, and sexuality across history. Specific federal and state case law and statutes are integrated throughout the book, but the text moves beyond the intersection between law and sexuality to focus just as much on social science as it does on law. This book will be useful in teaching courses in a range of disciplines, especially criminology and criminal justice, history, political science, sociology, women and gender studies, and law.

Psychedelic Humanities Erika Dyck, Tehseen Noorani, Nicolas Langlitz, Alex Dymock, Anne Katrin Schlag, Oliver Davis, 2024-06-19. Psychedelics are part of a resurgence of interest in consciousness studies, especially as altered states of consciousness are being re-examined in the context of psychedelic-assisted therapies. To date, discussions about psychedelics in modern medicine have been dominated by studies in biomedicine. However, given that cultural factors play a significant role in the subjective effects of psychedelics, psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical. Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend

narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences
