Promoting Trait Emotional Intelligence in Leadership and Education Roy, Shelly R., 2015-03-31 Humans have the capacity to detect and experience a wide spectrum of emotions in everyday life. However, the ability to identify and interpret those emotions is not a skill commonly held by all individuals despite the significance of this skill. *Promoting Trait Emotional Intelligence in Leadership and Education* provides the latest information on enabling educators and leaders across industries to monitor the emotions of others as well as their own in order to interact effectively with others. Focusing on best practices and methods for training those in education and leadership positions, this publication is essential to the research needs of education administrators, professors, managers, and professionals in various disciplines.

Handbook of Emotions, Fourth Edition Lisa Feldman Barrett, Michael Lewis, Jeannette M. Haviland-Jones, 2016-08-02

Recognized as the definitive reference, this handbook brings together leading experts from multiple psychological subdisciplines to examine one of today's most dynamic areas of research. Coverage encompasses the biological and neuroscientific underpinnings of emotions as well as developmental, social, and personality cognitive and clinical perspectives. The volume probes how people understand, experience, express, and perceive affective phenomena and explores connections to behavior and health across the lifespan. Concluding chapters present cutting-edge work on a range of specific emotions. Illustrations include 10 color plates.

New to This Edition: Chapters on the mechanisms, processes, and influences that contribute to emotions such as genetics, the brain, neuroendocrine processes, language, the senses of taste and smell; Chapters on emotion in adolescence, older age, and in neurodegenerative dementias; Chapters on facial expressions and emotional body language; Chapters on stress, health, gratitude, love, and empathy. Many new authors and topics extensively revised with the latest theoretical and methodological innovations.

Construct Validity Study of the Mayer, Salovey, and Caruso Emotional Intelligence Test (MSCEIT) Shane S. Chaplin, 2004

Measuring Emotional Intelligence Glenn Geher, 2004

Since being popularised by Goleman's 1995 best seller by the same name, *Emotional Intelligence* (EI) as a construct has permeated circles in both lay and academic psychological communities. This construct has been broadly applied to address health, education, and business concerns. An in-depth examination of EI research, however, suggests some concerns regarding this construct. In particular, a great deal of variety exists regarding how EI is best conceptualised and measured. The current volume is designed to address measurement issues regarding EI in a multi-faceted manner. The work presented here provides the interested reader with broad, in-depth, and critical perspectives on how EI is best measured and by extension, what EI really is.

Investigating Relationships Between the Subscales of the Mayer-Salovey-Caruso Emotional Intelligence Test and the General Ability Measure for Adults General Intelligence Test Tabitha Susanne

Harper, 2014 Research concerning traditional college student populations has demonstrated a relationship between cognitive ability often measured by academic success or grade point average and the ability to manage one's emotions both within and outside of the classroom. Studies further show that emotional intelligence plays an integral role in daily educational activities, self-regulation, and the establishment of goals, particularly for first-year students. Colleges and universities have begun to develop resources for all levels of undergraduates in order to ensure a smooth transition into the college environment and continued success socially and academically throughout their college residency. This study examined the relationships between the constructs of emotional intelligence and general or cognitive intelligence as measured by the subscales of the Mayer-Salovey-Caruso Emotional Intelligence Test (MSCEIT) and the General Ability Measure for Adults (GAMA) and determined to what extent the relationship between the subscales varied by gender. The participants consisted of 86 traditional undergraduate students from a cross-section of classes in the Department of Education at a southern university. Two data collection instruments were used in this study: the Mayer-Salovey-Caruso Emotional Intelligence Test (MSCEIT) and the General Ability Measure for Adults (GAMA). One of the study's most important results is that the General Ability Measure for Adults Total score is a significant predictor of the MSCEIT Understanding Emotions (UE) subscale score when controlling for the student's grade point average. In addition, grade point average is a significant predictor of the Managing Emotions and Perceiving Emotions subscale scores when controlling for the total GAMA IQ scores. Lastly, when the MSCEIT Understanding Emotions (UE) subscale was controlled for, gender proved to be significant in the prediction of grade point average. However, no additional statistically significant differences were discovered for females and males on the remaining MSCEIT Perceiving Emotions, Facilitating Thought, and Managing Emotions, and GAMA subscale scores: Matching Analogies Sequences and Construction. In conclusion, the results of this study add to the literature in Educational Psychology concerning the relationships between the emotional and cognitive intelligence of college students and provide a better understanding of the role that emotions play when college students are trying to solve complex cognitive problems.

An Examination of the Relationship Between Emotional Intelligence, Leadership Style and Perceived Leadership Effectiveness

Lisa Ann Weinberger, 2003 **Emotional Intelligence** Ralf Schulze, Richard D. Roberts, 2005 The concept of Emotional Intelligence (EI), the ability to perceive, express, understand, and regulate emotions, is still the subject of scientific debate despite its intuitive appeal and widespread popular interest in areas such as human resources, education, and organizational psychology. This book brings together leading experts from around the world to present their perspectives on the current status of EI. It covers theories of EI and assessment approaches in depth, as well as theoretical concepts and research findings on the antecedents and consequences of EI in occupational, educational, and clinical settings. The contributions provide an overview of the empirical evidence that supports as well as contradicts many common assumptions about EI and its relation to other forms of intelligence. The book thus reflects the diverse approaches to finding solutions for the still unresolved conceptual and

empirical problems and offers a critical appraisal of the current status of EI
