in Africa Deborah Snelson, Annette Lanjouw, 1997 Geomorphology and Society Michael E. Meadows, Jiun-Chuan Lin, 2016-06-17 This book deals with the relationship between geomorphology and society This topic has had rather scant treatment in the literature except to some extent under the label applied geomorphology. In this text the authors aim to bring together conceptual issues and case studies of how geomorphology influences society and indeed how society is in turn influenced by geomorphology. In an age in which the influence of human activities on global environments has become so paramount that it is increasingly common to refer to it geologically as the anthropocene the book aims to reflect on the geomorphological significance of widespread and diverse forms of human impact in a range of environmental settings
