Libre-échange et protectionnisme , Entre

libre-échange et protection Pierre Olivier Peytral, 2011 La dichotomie libre échange versus protection structure l'analyse de la politique commerciale dans les manuels de la théorie du commerce international En analysant les impacts respectifs de la politique libre échangiste et de la politique protectionniste sur l'allocation des ressources et le bien-être les modèles standard au premier rang desquels figure le modèle HOS concluent l'optimalité par tiennne du libre échange La prescription normative est alors que tous les pays devraient appliquer une politique de libre échange qui préserve les prix justes Cependant les analyses empiriques mettent en lumière le décalage de cette prescription normative les politiques commerciales pratiquées incluent dans des proportions variées entre pays entre industries et entre biens des mesures qui visent de façon simultanée et sélective

la promotion des exportations la substitution aux importations et la création d'un accès facilité aux importations. Les politiques pratiquées ne sont donc ni strictement libre-changistes ni strictement protectionnistes mais mixtes a priori. Ce constat a conduit au développement de modèles analysant les conséquences sur l'équilibre général de l'application de divers instruments de politique commerciale et specifying les différentes formes potentielles de cette politique. Notamment il est expliqué que la politique commerciale mixte constitue une politique alternative. Les interventions sélectives qui la composent sont alors justifiées par la présence d'avantages comparatifs dynamiques qui conditionnent et orientent ces interventions vers des industries singulières dont la production est destinée au marché national et/ou au marché international. Mais l'assise théorique dont bénéficie ainsi la politique commerciale mixte ne aide pas comprendre le processus politique au travers duquel cette politique est choisie. Elle ne permet pas d'ouvrir la boîte noire et de pénétrer le noyau des choix politiques. L'économie politique le permet. L'explication théorique de l'objet politique commerciale mixte se situe à la croisée des deux approches constitutives du champ de recherche de l'économie politique : la protection l'approche centrée sur la société et l'approche centrée sur l'État. Alors que la première approche explique que la politique est façonnée par les intérêts et les préférences des acteurs privés ou groupes de les plus puissants présents sur le territoire national la seconde considère que la politique est fonction des institutions politiques et des acteurs politiques qui cherchent satisfaire leur intérêt et leur préférence compte tenu des contraintes nationales et internationales auxquelles ils sont confrontés. La politique commerciale mixte peut donc s'analyser dans différentes perspectives selon les déterminants endogènes qu'on entend privilégier. Au final la mixité de la politique commerciale résulte d'un compromis politique et institutionnel entre acteurs aux préférences hétérogènes ce qui est partiellement remis en cause par les contraintes politiques et les influences institutionnelles internationales. Le compromis politique et institutionnel résulte de la division du gouvernement induite par un partage inégal du pouvoir de décision fonction des institutions politiques entre veto players. Acteur composite possédant un droit de veto dans le processus de prise de décision politique et de l'hétérogénéité de leurs préférences. La politique choisie et les institutions associées doivent satisfaire l'intérêt de chaque veto player ce qui implique des mesures compensatrices et la prise en compte de l'héritage institutionnel. Non sans résistances la flexibilité avec laquelle la politique commerciale mixte peut être utilisée est alors réduite par les contraintes politiques internationales et/ou en amont l'équilibre politique interne la structure des préférences nationales modifiée par celles-ci et par les influences institutionnelles internationales.

Après le libre-échange. Quel commerce international face aux défis écologiques

Mathilde Dupré, Samuel Lere, 2020-10-01. Comment faire pour que la viande que nous consommons ne soit pas un facteur de déforestation en Amazonie ? Que les travailleurs qui confectionnent nos habits ou extraient les métaux rares présents dans nos téléphones ne risquent pas leur vie pour un salaire de misère ? Quelles leçons tirer de la crise économique déclenchée par la pandémie de Covid-19 ? Une partie de la réponse se trouve dans les règles commerciales qui structurent les activités économiques internationales. Car le constat est là : non seulement le Libre-échange n'a pas tenu la promesse de prospérité planétaire avancée

par ses défenseurs mais il accélère la destruction de nos systèmes renforce les inégalités fait fi de nombreuses violations des droits humains et dépossède les peuples de leur capacité d'agir Les auteurs se livrent une critique rigoureuse et chiffrée des accords de commerce dont les plus récents Tafta Ceta accord avec le Mercosur ont suscité de vives oppositions citoyennes Mais la critique ne suffit pas Car le choix du libre échange a été permanent au cours des dernières décennies de la part de dirigeants prompts à crédibiliser toute proposition alternative Il est pourtant possible de remettre le commerce au service de la société et de la transition écologique et sociale Avec de multiples propositions concrètes et ambitieuses les auteurs invitent à inventer enfin un juste échange réellement durable
