Literature for Children and Young Adults Mingshui Cai, 2002-10-30 There is much discussion of multiculturalism in education This is especially true of multicultural literature for children and young adults The rise of multicultural literature is a political rather than a literary movement it is a movement to claim space in literature and in education for historically marginalized social groups rather than one to renovate the craft of literature itself Multicultural literature has been closely bound with the cause of multiculturalism in general and thus has been confronted with resistance from conservatives This book discusses many of the controversial issues surrounding multicultural literature for children and young adults The volume begins with a look at some of the foundational and theoretical issues related to multicultural literature The second part of the book addresses issues related to the creation and critique of multicultural literature including the authorship of such works and the role of the reader in determining whether or not a work is multicultural The third looks at the place of multicultural literature in the education of children and young adults Throughout its discussion the book makes extensive references to a large body of multicultural fiction and provides a thorough review of research on this important topic

Native Americans Jamie N. Babcock, Amanda C. Carr, 2007 [Thematic Unit](#) Daphne Ransom, 2000 [Native American Thematic Unit Plan](#) , Laurence Hemingway and others present a social studies unit for upper elementary classes that focuses on the culture of Native Americans and the origin of Thanksgiving This is a three week unit and the creators highlight the activities for each day as well as the unit goals The College of Education at Wayne State University in Detroit Michigan provides the unit online as part of a resource for social studies educators *Let's Research Native Americans* Cindy Nottage, Virginia Morse, 2002-01-01 **Contexts for Learning** Ellice A. Forman, Norris Minick, C. Addison Stone, 1996 This work presents landmark research concerning the vital dynamics of childhood psychological development Its origin can be traced to the late 1970s when several psychologists began to challenge existing notions of cognitive development by suggesting that such functioning is bound to specific contexts and that cognitive development is based on the mastery of culturally defined ways of speaking thinking and acting About the same time several translations were made available in this

country of the seminal work of Vygotsky the noted theoretician offering a conceptual base on which these workers could build This volume with contributions from many of the scholars who pioneered this area and translated the work of Vygotsky looks at the complex mechanisms by which children acquire the cultural and linguistic tools to carry out cognitive activities and explores the implications of this research for education The book is organized around three main parts Discourse and Learning in Classroom Practice Interpersonal Relations in Formal and Informal Education and The Sociocultural Institutions of Formal and Informal Education An afterword by Jacqueline Goodnow suggests new directions for sociocultural research and education The intended audience is composed of developmental educational and cognitive psychologists along with advanced students in developmental and educational psychology
