Wagner, Andrew W. Moore, Ron M. Aryel, 2011-04-28

Provides a coherent and comprehensive account of the theory and practice of real time human disease outbreak detection explicitly recognizing the revolution in practices of infection control and public health surveillance Reviews the current mathematical statistical and computer science systems for early detection of disease outbreaks Provides extensive coverage of existing surveillance data Discusses experimental methods for data measurement and evaluation Addresses engineering and practical implementation of effective early detection systems Includes real case studies **The Genealogy of a Gene**

Myles W. Jackson, 2015-02-20 The history of the CCR5 gene as a lens through which to view such issues as intellectual property Big Pharma personalized medicine and race and genomics In The Genealogy of a Gene Myles Jackson uses the story of the CCR5 gene to investigate the interrelationships among science technology and society Mapping the varied genealogy of CCR5 intellectual property natural selection Big and Small Pharma human diversity studies personalized medicine ancestry studies and race and genomics Jackson links a myriad of diverse topics The history of CCR5 from the 1990s to the present offers a vivid illustration of how intellectual property law has changed the conduct and content of scientific knowledge and the social political and ethical implications of such a transformation The CCR5 gene began as a small sequence of DNA became a patented product of a corporation and then when it was found to be an AIDS virus co receptor with a key role in the immune system it became part of the biomedical research world and a potential moneymaker for the pharmaceutical industry When it was further discovered that a mutation of the gene found in certain populations conferred

near immunity to the AIDS virus questions about race and genetics arose Jackson describes these developments in the context of larger issues including the rise of biocapitalism the patentability of products of nature the difference between U S and European patenting approaches and the relevance of race and ethnicity to medical research Vitamin D, An Issue of Endocrinology and Metabolism Clinics of North America Sol Epstein,2010-06-29 This issue covers essential topics in endocrinology and Vitamin D providing the most up to date information Subject matter covered includes the extra skeletal effects nutritional needs Vit D assays Rickets osteomalacia immune properties of Vit D osteoporosis Vit D analogs and properties renal disease Vit D receptor cancer and diabetes *The Law of Medicare and Medicaid Fraud and Abuse* Timothy S. Jost, Sharon L. Davies, 2000 **Vitamin D** Sol Epstein, 2010 This issue features internationally renowned experts who have provided their expertise on a variety of topics related to the importance of vitamin D It was not until feedback loops were identified between vitamin D production and parathyroid hormone phosphate that it earned its place as a true endocrine hormone Current social and economic conditions have brought it back into the limelight with outbreaks of rickets and osteomalacia even in developed countries However its complex regulation together with the identification and characterization of the vitamin D receptor and its role in influencing multiple genetic pathways and function has heralded a new era highlighting its importance in health and disease This includes its role in autoimmune diseases such as multiple sclerosis diabetes mellitus cancer especially breast and prostate skin neurological and cognitive disorders and infectious diseases such as tuberculosis We now know that adequate levels of vitamin D it is important in preventing falls and fracture The need for supplementation and the amount recommended has also changed considerably from what we previously considered sufficient The ongoing development of selective active analogs of vitamin D targeted to specific organs and function leads to the exciting possibility of improving outcomes of diseases associated with vitamin D regulation
