**Digging Deeper** M. Gail Hickey, Jeremiah Clabough, 2017-06-01 Experts in social studies education and gifted education share teacher-tested strategies for differentiating social studies in K-12 classrooms. Chapter authors showcase best practice and research-based lessons and activities that enrich and expand social studies instruction while building K-12 students' critical and creative thinking. Each chapter contains two or more teacher-tested lessons or activities linking social studies content and concepts to the standards and recommendations of the National Association for Gifted Children (NAGC) and National Council for the Social Studies (NCSS). This edited volume is targeted toward K-12 teachers and administrators, gifted education coordinators and consultants, parents of gifted children, social studies methods instructors, and central office administrators. Each chapter contains activities that can be adapted and replicated in teachers' classrooms. Chapters focus on significant social studies topics such as civic education, historical thinking, drama, and teaching with primary sources. Each topic is approached in ways that meet the needs of gifted education students. **International Handbook of Research on Multicultural Science Education** Mary M. Atwater, 2022-06-30 This handbook gathers in one volume the major research and scholarship related to multicultural science education that has developed since the field was named and established by Atwater in 1993. Culture is defined in this handbook as an integrated pattern of shared values, beliefs, languages, worldviews, behaviors, artifacts, knowledge, and social and political relationships of a group of people in a particular place or time that the people use to understand or make meaning of their world, each other, and other groups of people, and to transmit these to succeeding generations. The research studies include both different kinds of qualitative and quantitative studies. The chapters in this volume reflect differing ideas about culture and its impact on science learning and teaching in different K-14 contexts and policy issues. Research findings about groups that are underrepresented in STEM in the United States and in other countries related to language issues and indigenous knowledge are included in this volume.
